ithout wanting to give too much away, we have to tell you that the changes we've been planning are finally starting to happen. TIPS & TRICKS has always been "more than just cheat codes" (as this month's cover proclaims), but a lot of non-readers tend to pigeonhole us as a code magazine that does nothing more than present information that can be found on the Internet for free. Our longtime readers know that this has never been the case, but even so, we've never stopped looking for more and better ways to reach out beyond the boundaries of the stereotypical video-game tips magazine.

Video-Game Comics is just the first of several new monthly features that we hope you'll dig. Our new resident comics expert, Gabe Soria, was hand-picked for this assignment because of his expertise in the areas of both comics and games, which he earned as a writer for DC Comics as well as our former sister publication, VideoGames Magazine. It's tough to find the right person for any job, but no one could have been a more perfect match.

Another new monthly column won't start until our next issue, but you're getting a sneak preview of it this month with Pat Reynolds' *Mega Man:* Powered Up strategy guide. The level editor in this game is one of the most exciting

features we've seen in decades of playing video games; we think that you'll be messing around with it for months, if not years. Pat's upcoming Mega Man column will launch with a look at the special Tips & Tricks level that he's designing for download from Capcom, and he'll also be giving tips on how to build some sweet level designs of your own. But instead of just continuing Powered Up coverage, the plan is to expand the focus of the column to include all Mega Man games and news about the Mega Man character, as chronicled by one of the world's most dedicated Mega Man fans.

Unfortunately (or as some would say, *finally*), adding these new columns might mean that we'll have to put an end to our mad-crazy coverage of *Grand Theft Auto: San Andreas* and *Halo 2*. We've been babbling on and on these two red-hot games every month since they were released (back in 2004—that's a lot of pages!), and it won't be long before we've run out of things to say about them. These columns have earned us a lot of positive feedback, though, so we'll be on the lookout for more games that are worthy of this kind of continuing coverage. Needless to say, they don't come along very often.

We can't reveal too much more just yet, but keep your eyes peeled for further additions, refinements and improvements in the coming months; you may even see the return of at least one of our older features that you've been asking for us to bring back. The purpose of all these changes, we hope, is that we'll do a better job of speaking to the heart of the TIPS & TRICKS reader. If there's anything we've learned about you from all the letters and reader surveys you've sent to us over the years, it's that you're really dedicated to the subject matter. You have a passion for video games and their secrets, and we want to stay right there with you. Thanks for taking the time to read this.

he magical worlds of Disney and Final Fantasy unite once again in Kingdom Hearts II. Just when Sora, Donald and Goofy thought they had saved the world, the Heartless strike again. Incredulous that all their work was for naught, the three warriors welcome their new plight. If anything, this new adventure will let them continue their growing friendship. There are many worlds to explore and many old and new friends to save, so let's not waste any time! There are three Modes to choose from when you start the game: Beginner Mode, Standard Mode and Proud Mode. This strategy guide is for the default Standard Mode.

the sullidate to the second

The 1st Day

The game begins with a surprise: You're not Sora, you're Roxas! The Roxas portion of the story is basically an indepth tutorial on how to play the game and is marked by days. After learning the basics like moving and targeting, Seifer, the neighborhood jerk, will challenge you to

your first battle. You have three choices for a weapon: a staff, a hand guard and a light club. By choosing one of the weapons, a bonus point will be added to your Magic (staff), Defense (hand guard) or Strength (light club) level. Seifer turns out to be nothing but a paper tiger and you should beat him pretty handily. Whenever he yells out his silly "romantic" cry, he will do his leaping attack; just shift away and attack him from behind.

After the scuffle, a mysterious creature will appear. Follow it through the Woods and out to the Old Mansion. Your wimpy weapon will turn into an awesome Keyblade, allowing you to demolish the thing. This is where you'll learn the critical Reaction Command button (\triangle), which in this case

lets you shift to the other side of the creature so you can attack from behind.

The 2nd Day

After getting the Twilight Town Map, you will need to make some money for your "beach trip." There are two "Help Wanted" boards on Market Street at Station Heights and Tram Common. For each job, you can make anywhere from 10 munny (for a lame effort) up to 100

munny (for a truly exceptional performance). You will need to have a total of 800 munny in order to progress to the Station, but making over 1,200 munny will give you an AP +2 bonus. Make over 2,000 munny and the game will automatically take you to the station.

Mail Delivery-You need to make five deliveries: three to the people wandering on the street and two to the flying white doves. The doves are the tricky ones, since you need to get some air. You only need to jump slightly on your skateboard to hit the first dove, but for the second

dove, you'll have to grind down the side of the stairs with the \triangle button, then quickly hit the \triangle button again to deliver the mail in midair.

Cargo Climb—First, lock on to the cargo by pressing R1. Do a combo on the cargo by jamming on the X button. The cargo will launch up into the air, where you must quickly jump into the air and hit it again. The cargo will only move forward when hit in the air, so you have to jump up to

meet it quick. Three or four air attacks and the cargo should be inside the garage.

Grandstander—This job is tough at the onset of the game, especially with your limited moves, so don't expect to make a lot of cash here. You have to keep the ball up in the air by attacking it with combos. Try trapping the ball into corners of buildings and stay under it as

much as you can. Remember to lock on to the ball.

Poster Duty-This one is the easiest job to make big money on if you can find a good route to take. Since you only have to put up 20 posters, the numerous billboard spots give you plenty of options to shave down your time. Keep an eye out for the areas where you can slap three posters up in a

row by quickly pressing the \triangle button. Even if you see a spot that seems too far to jump, Roxas can leap up and slap a poster onto anything that shows the green triangle icon.

Bumble-Buster—Instead of locking on to one set of bees, leave the targeting system off and swing away at the horde. Make sure to keep jumping to avoid getting hit by the bees. If you get knocked down, it will take time to get up, which can eat up the clock. When there are only one or two

ACT BY TOP

groups left, you can flick on the targeting and finish them off.

Junk Sweep—The key to this job is to minimize the amount of swings it takes to wreck the whole junk pile. Since this job isn't timed, take your time and push the trash items close to each other. Keep one piece of junk far from the rest of the gathered heap and perform a combo on it so it

launches into the pile and smashes them into smithereens.

The 3rd Day

Head to the Station and a strange event will lead you into another world. At the Station of Serenity, you will once again need to make a choice between a Sword, Shield and Staff. Your decision here will affect the rest of the game in the way that your character develops his skills.

You will put your new weapon to the test as three Nobodies challenge you to battle. More enemies attack in the Station of Calling. You should equip Aerial Recovery and Auto Potion at this point. Aerial Recovery is very useful when you get knocked down by an enemy and will prove to be a blessing throughout the game. Plus, you'll need it when you enter the next door!

Twilight Zone (1,500 HP)—As soon as the giant Nobody strings you up into the air, get ready to push the \triangle button when the green triangle icon appears on the screen. This is a three-chain Reaction Command combo, so be ready to press the button two more times immedi-

ately following the first move! The game doesn't penalize you for pressing the button before or after the icon flashes, so quickly jamming on the △ button during the Reaction Command sequence can also be quite successful. The boss will get knocked out, giving you enough time to lock on to his head and give it a good lashing. Twilight Zone will then get up and

out waves of thunder, plus a few minions to boot. Alternate between the Attack and Reversal command and keep your target on his head. You will be strung up again and the entire pattern will be repeated until the boss is dead.

start sending

Head to the Sandlot and get pumped for the Struggle Tournament! Before entering the tournament, you might as well face Seifer in the Back Alley for a warm-up fight, since you will also get a Strength increase! You should also make sure that your upgrades are properly up to

date, including having Guard equipped. In the tournament, the trick is to collect as many Orbs as possible before time runs out. This involves smashing your opponent to make him spill his Orbs, while trying not to lose your own. It's easy to forget to collect the Orbs while bashing your opponent, so stay focused!

The first fight is against your friend, Hayner. His main attack involves two big swings and a pause, allowing you to shift away and hit him from behind. Your next opponent, Vivi, can attack from afar, but also has an attack-and-pause pattern that can be exploited. You will have to be

quick gathering Orbs, however, since Vivi can be sprightly.

Your tournament will be disrupted by the pesky Nobodies, as well as the cool-but-shady Axel. There are no Orbs involved in these fights; it's for real! Axel's powerful fire attack should be avoided by running to the other side of the stage, but his overzealous attack also leaves him vulnerable from behind.

And back to the tournament! Fortunately, you get a little break before the final bout against Setzer so you can save after the Axel confrontation. It turns out that Setzer is an absolute joke compared to the formidable Axel. Simply knock him down while he's busy taunting you,

but make sure you avoid his counterattack when he gets back up. You will be rewarded with the Struggle Trophy and a Champion Belt, a valuable item that increases elemental magic defense when equipped.

The 5th Day

When you reach Sunset Station, talk to Pence and he will show you the map to the Seven Wonders in town. The

to Pence ill show he map to Seven ronders in own. The first Won-

der, the Spooky Steps, turns out to be nothing, so it's already checked off on the map. While you're here, press △ to jump up onto the tram and access the Ability Ring.

The Friend Beyond the Wall—Go check out the brick wall by Hayner. Spheres will come flying at you from the wall, preventing you from getting near it. Find a space between the spheres to move forward. Use Aerial Recovery to bounce right back up when you get hit and press △ when you get to the wall.

The Doppelganger—The waterfall near Olette reveals an evil shadow of Roxas! Jump and attack the shadow to avoid its counterattack style.

The Animated Bag—Go to the Top of Sunset Hill. Press \triangle and ride the bag until its Stamina meter runs out. Press \triangle to avoid the trash cans. Jamming on the \triangle button works here, too!

The Moans from the Tunnel—Enter the tunnel in the middle of town and you will be assaulted by multiple Vivis! They may seem to be spawning endlessly, but they only take one hit to disappear, so hang in there!

After several cutscenes, you will need to find a way to the Old Mansion. There is a hole in the wall in the Tram Common area that goes out to the Woods. Go through the Woods to reach the Old Mansion.

The 6th Day

You'll meet Axel in the Back Alley and more enemies will appear. Suddenly, Axel and the entire town of Twilight will freeze in time. Make your way through the Tram Common and out to the Old Mansion. You will meet several Nobodies along the way.

Take your time and scour the Mansion for treasure chests, while building up your experience level with enemy encounters. The Elven Bandanna in the Dining Room is a good score for your party's Armor. After an extensive cutscene in the White Room, you will receive Naminé's Sketches and

the Mansion Map. Now you can go into the Library and access the strange puzzle on the table. Go down into the newly opened area. Axel will appear after you defeat a string of Nobodies in the basement lab. He will often hide behind the wall of fire and come charging down from above, so keep the lockon fixed onto him. He will usually shout something when he comes charging, giving you a split-second to move out of

the way. Fortunately, when you get knocked into the air, the Reaction Command sequence will kick into gear. Axel will get stunned after the sequence, allowing you to attack him without getting repelled.

After the Axel fight, it's a good idea to explore the basement lab area, since you won't be down here again for a while. Once you gain control of Sora, Goofy and Donald, you will have some opportunities to get the feel of fighting as a party. Before you head out on the train at

Central Station, you should make sure your abilities are updated, like equipping Sora's Combo Boost. Also, check around town for treasure chests and perhaps do a little item shopping.

As you make your way up the Tower to see Yen Sid, the Heartless will come in droves, especially in the Star Chamber and Moon Chamber. They're not hard to defeat, but they appear in groups and can totally smother you. Use Reaction Commands to get you out of a pinch.

Once you reach the Sorcerer's Loft, Yen Sid will make you read a book about the Kingdom Hearts lore and give you the lowdown on the whole Heartless/Nobodies relationship. Open the large chest to get the Tower Map. The Sorcerer will send you to the Wardrobe where the fairies

from Sleeping Beauty will give you a Star Seeker Keyblade and the Valor Form. "Drive" is now accessible from the Commands menu, plus a tutorial will show you how it works. Now it's off to the Gummi Ship as the adventure really begins!

You'll have a chance to freely scope out the area and chat with townsfolk, like Uncle Scrooge, and learn a little about Mog's Workshop. You'll receive a Marketplace Map along the way at the Borough, and meet up with Leon's crew at Merlin's House. Merlin will hand you

the Membership Card and Blizzard Element, plus you can finally use "Magic" from the Commands menu!

Head to the Bastion, where Sora and Leon will protect the gate from the Heartless swarm. If the gate's green damage meter

runs out, it'll be "game over." Your job is to defend the gate while Leon holds the other end. Make sure you have your healing items ready, since Donald and Goofy will not be here to support you in this fight.

Ping (from Mulan) joins your party from the onset. Head to the Encampment and fight the Heartless. Like the Struggle tournament, you need to collect Orbs as you defeat the enemy...except in this case, the Orbs serve to maintain your party's Morale. You will then re-

ceive the Encampment Area Map.

The three Captain's Missions mainly involve attacking all the Heartless in the area. "The Surprise Attack" should be an easy mission for you at this juncture. "The Ambush," however, introduces the Assault Rider, a formidable op-

ponent who should be at-

tacked from afar with magic. If you have the urge to hit him, you need jump in and attack instead of going head-on. Use the lock-on function when tackling "The Search" so you can catch the Heartless lurking behind the tents. You will receive an AP Boost item from the satisfied Captain and the Summit path will now be open.

Use the △ button to bust through the walls as you make your way up the Mountain Trail. And remember, you still need to collect Orbs for Morale! Once you enter the Village Cave, the battle can get pretty rough. Get rid of the regular Shadow Heartless first be-

fore taking on the brutal Assault Riders. When you exit the cave, the town will be decimated. Once you get up to the Ridge, you can use the small wind storm to lift you off the ground by pressing \triangle .

Blade—to keep the Thrusters at bay.

Mulan learns a new ability and "Limit" is now accessible from the Commands menu. As you head out to the Checkpoint and Mountain Trail, bust out your new Limit combo on some hapless Heartless. As with the Reaction Commands, use the \triangle button to advance through

tle where you just have to

survive for about a minute.

Don't even bother with the

Bolt Towers and just use the

the combo. Bolt Towers will also get nasty in the Courtyard; use Bolt Reversal to knock their projectiles back at them!

At the Palace Gate, concentrate on the Nightcrawlers first before going after Shun Yu. Once you've collected the Orbs and the gate is secure, use Mulan's Limit combo to stun Shun Yu. When your Keyblade crosses with his sword, be ready to press △ and do a Takedown. Trans-

forming into the Valor form will also put the hurt on the old man. Your reward will be the Hidden Dragon Keyblade.

BEXSES EXSELE

When you come out to the Entrance Hall, make a right up the stairs to get to Belle's Room. After grabbing the Castle Map, head to the West Hall. The Large Body Heartless can be a handful in the Castle. You have to attack it from behind until you see the triangle icon appear. Kick it across the room with Full Swing and finish it off with a magic projectile. When they appear in groups, it can be a very hairy situation. Just keep your cool and dispose of them one at a time.

The Wardrobe in the West Hall can only be pushed while it's sleeping. Pay attention to the green indicator on the bottom left; push \triangle only when it says "Push!" and don't do anything when it says "Awaken!" Wait until the Wardrobe falls asleep again and repeat the sequence.

Thresholder (350 HP) & Possessor (250 HP)—The double doors aren't the only things that are possessed in the Undercroft, as Gargoyles and others will disrupt your main fight. Try to step up to the doors and slash away at them until the triangle icon appears. Possessor will eventu-

ally detach from Thresholder and fly about the room, leaving it vulnerable.

After getting the Basement Map in the Dungeon, come back out to the Undercroft and climb the pile of cabinets on the left side. Talk to Cogsworth on the upper level and he will guide

you through the Secret Passage. Cogsworth will hop on the lever to lower three lanterns. You need to light them all before he gets tired and releases the lever, otherwise you will need to revive him. Since this is a team effort with Lumiere and Mrs. Potts, you will need to wait for them before you can light the lanterns.

The Beast needs to come to his senses! Although Cogsworth may be too small to see during the battle, the green triangle symbol lets you launch him toward The Beast with the "Wake Up" maneuver. The Beast will sustain a few blows before finally coming to. He will then join your party. Head

to Belle's Room and speak to the Wardrobe.

Shadow Stalker (450 HP) & Dark Thorn (1,000 HP)-Shadow Stalker likes to hide behind the wall and blast columns of fire, as well as possessing the pillars and turning them into thrashing tentacles. Use the lock-on function to spot which pillar it's hiding in and attack it

until it comes out of hiding. When it's out in the open, you should use The Beast's Twin Howl Limit attack. The second form. Dark Thorn, is twice as strong, so you will have to rely on Reaction Commands to defeat him. The three-part combo will spear him onto the chandelier and swing him around the room, giving you a chance to attack the dizzy demon. You will receive the Cure Element after the battle.

At this point it's a good idea to make a trip back to Hollow Bastion to Merlin's place. Donald will open the Pooh story book for you to enter. Once you're in the book, go over to Pooh Bear's Howse. Something goes wrong and you're kicked out of the book. Fight the heartless and reclaim the book. Go back to Pooh Bear's Howse and you'll see the cuddly guy doing exercises. Pooh doing exercises? Something is definitely wrong here! Jump back to Merlin's House and you will receive the Baseball Charm. Now you have the "Summon" ability and can call up Chicken Little!

combo to make these battles quick.

Cerberus (1,000 HP)—Donald and Goofy will sit this one out. Use Auron's Limit combo as well as the Reaction Command when Sora jumps in between Cerberus' three heads. After the sequence, Cerberus will go unconscious and his heads will fall to the ground. Run over and attack the same head as Auron,

so you can disable one of the heads quicker. You simply have to survive this one until Auron can hold off the beast by himself.

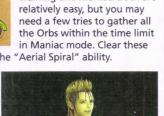

Back at the Coliseum Foyer, you will meet with Hercules; get the Coliseum Map and start your training with Phil. Phil has two training levels: Training and Maniac. Both are relatively easy, but you may need a few tries to gather all in Maniac mode. Clear these

two mini-games and you'll get the "Aerial Spiral" ability.

Demyx can't fight worth a lick, but his sitar unleashes 100 water forms that need to be defeated within 80 secands! Since Demyx can't be hurt, defeat the forms by primarily using the Wild Dance command. You will retrieve the Olympus Stone.

Herc's Invincibility move and Reaction Commands when Pete creates a shield around himself. Now that Megara doesn't need to be protected, go all-out on Pete!

Hydra (body = 1,050 HP, neck = 160 HP each)—During the Hydra battle, Phil will be yelling at you to get on the Hydra's back. Once you get up there, use the Reaction Command and execute the Urninator attack with Phil. When the Hydra conks out, run quickly to each head and

hack it off. If you fail to chop off all three, the other heads will grow back when he reawakens. The second half of the battle increases the Hydra's headcount! Use Pegasus to fly up and attack each head with the \triangle button. Jump and swing away at the heads when your MP is low and wait until you can use Pegasus again. The final triangle command with Pegasus will lob the main head off. You will be rewarded with the Hero's Crest Keyblade for your valiant display!

There are just too many Bolt Towers to fight head-on in the Audience Chamber. As you and Minnie try to get to the throne, call her over and engage Faith Drive to blast away the Towers, giving you space to move forward. Watch Minnie's health until you safely arrive at the end of the carpet.

TAIONELESS RIVER

Don't adjust your sets! It's the classic black-and-white days of Steamboat Willie, the 1928 Disney cartoon that introduced the world to Mickey Mouse! Head out to the Pier and meet Captain Pete. Oldstyle Pete's mad dash can be countered with the "About Face" command. Of course,

you'll soon realize that this isn't the "bad" Pete!

The four theater curtains on Cornerstone Hill need to be purged of Heartless. In the first curtain, "Building Site," the Heartless need to be eradicated before the scaffolding falls. In "Lilliput," you need to save the town from the Aeroplane Heartless. Use the handy cannon in the middle

of the town. "Scene of the Fires" is a fairly challenging battle, especially against the Hot Rod Heartless. Use your Drive transformation to make quick work out of them, or else the buildings will burn down! In "Mickey's House," keep Mickey's stuff from being totally destroyed by making sure the Mayhem meter doesn't aet out of control.

Down at the Waterway, "bad" Pete will hurl stuff at you from the steamboat. Use the Overhand command to knock the items back at him. Enemies will try to disrupt you during this battle, but Goofy and Donald are strong enough now to ward them off and let you focus on the

task at hand. Pete will dock the boat when he gets knocked out. Run over to the boat, grab the hook (press \triangle) and swing over to the cage. Swing away as much as you can at the cage bars, before Pete gets up again. Two or three rounds should do the trick.

"Bad" Pete does a fierce ground-pound, but fortunately you have the "good" Pete on your team to do the same to him! Use the same "About Face" move on Pete to get him dizzy. As the fight goes on, Pete will flash a 'That's All, Folks!"-style Pete logo and transport the battle

to one of the four theater scenarios. Don't get distracted by the changing background; just focus on taking down Pete! You will obtain the Monochrome Keyblade, which has a neat feature where it can draw in Orbs toward you. You will also get the second Drive Form—Wisdom—back at Disney Castle. A new episode in Olympus Coliseum will also be opened.

The Naval Map can be found right at the start. When you get down to the Harbor, you will be attacked by Barbossa's pirates. You won't be able to kill them at first. Use the A button to deflect their gun shots. When the moon shows itself in the next phase of the battle, the pirates will reveal

their true decomposed selves and will be susceptible to damage.

In order to get through the town, lock on to the crates that are blocking the paths and tear them apart. Some treasures can also be found behind crates, so take your time and explore. Once you're back at the Harbor, speak to Jack Sparrow and he'll join your party. Make sure you're

ready to depart on the ship before talking to Will.

While on the Interceptor, talk to Jack to access the sea map and set your course for the Black Pearl. There will be a quick battle on the ship's deck, before you reach Isla de Muerta. At the Cave Mouth, you have one minute to hold off the ghosts until your ship is ready to sail.

Since you can't expose the pirates to moonlight here, deflect their gun shots with Return Fire and defend yourself. You will receive the Isla de Muerta Map after Will tells a story.

Back on the Interceptor, Will has taken the wheel. Talk to him to direct the ship to Port Royal. You will encounter a series of battles on the ship. One of them involves protecting the Medal from ghost pirates. Once a pirate picks up the medal, you have one minute to find

him and take him down. You will need to coax the pirates into the moonlit upper deck area to expose their mortality. Kicking the cannons will blast the enemy ship, but it's not a priority in this instance.

> Jack will join your party and continue the fight on deck. In this phase, there are five burning barrels and

only a handful of seconds to knock them off the ship. Leave the fighting to the rest of your party and don't waste any time engaging an enemy. The barrels are located on both the lower and upper decks, so move quickly and hurl them off the ship! Back on the island, you will need to break the crates in the Powder Store area in order to expose the pirates to moonlight.

Barbossa (1,200 HP) & Illuminators (50 HP each)—In the Treasure Cove, Barbossa calls on Pete to have the Heartless help him out, namely the Illuminators. Like the other pirates, Barbossa is also vulnerable to moonlight, but the Illuminators are able to block out the light and create total

darkness. When the area becomes dark, use the lock-on system and look for the small light emitting from the Illuminator's lamp. Take down the lizard and Barbossa will be exposed to

moonlight. Use the "Blade Reversal" command and Jack's Limit move to send Barbossa back to the grave. You will receive the Follow the Wind Keyblade.

ACRABAD

After meeting lago, a fight breaks out, but it's another teaser battle that leads you into the Peddler's Shop. The streets of Agrabah are hostile, but soon Aladdin joins the party to give you some muscle. On your way to the Cave of Wonders, places like the Bazaar and Palace Walls

are teeming with treasure items, so look around after the Heartless have trashed things like the fruit stands. The Skill Ring is definitely a keeper!

Inside the Cave of Wonders, you will learn to despise a new breed of Heartless—the Fat Bandits. Just as annoying as the Large Bodies, they have the bonus ability of breathing fire! They tend to appear in groups. The best strategy is to lure them away from each other, since they'll torch your

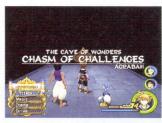

behind while you're whipping the behind of one of their buddies. If you're surrounded, a circle of Fira is your best way out.

Apu is carrying the jewel while your party tries to traverse the Stone Guardian pool. Stay behind Apu and press \(\Delta\) to make him jump over the oncoming waves. Disregard the enemies around you and let your friends take care of them. You also should have enough

health to get through the pool if you're getting pummeled.

In the Chasm of Challenges, you'll have two minutes to defeat all the enemies. The floor will keep breaking, sending you to a lower level. Enemies that aren't eliminated before you fall will carry over to the next floor and make it harder, so get rid of them fast! Open the next

door by activating the sign and make sure you grab the Cave of Wonders Map from the chest.

Volcanic Lord & Blizzard Lord (650 HP each)—After what seems like an endless stream of Heartless—thanks to Pete—you'll meet two bosses at the Palace. Great! If you've played enough *Final Fantasy* games, you should know that fire-based monsters are weak against Blizzara magic, while

a Blizzard creature would be toast against Fira magic. Of course, you can always use the Reaction Command to toss them in the air. Although they look like Large Bodies and Fat Bandits, they are actually vulnerable from all sides. Rock their world and you will acquire the Lamp Charm. Now you can summon Genie!

Jack Skellington will join you in Dr. Finkelstein's Lab, where you will also find the Halloween Town Map. Halloween Town Square is filled with deathly gadgets—like the dragon fountain and guillotine—that can aid you during battle. After passing through the Christmas Tree

Door, you can also use the merry-go-round to deliver blows to the enemy. When you finally meet Santa, make sure you grab the Christmas Town Map and enter the next room, Shipping and Receiving, for a cutscene.

Prison Keeper (2,000 HP)— Your party follows the footsteps in the snow back to Halloween Town, where Maleficent throws Lock, Stock and Barrel into the Prison Keeper—your next boss encounter! Climb the spiral hill in the center of the arena so you can be eye-level

with the high-flying Prison Keeper. You can either jump toward it and deliver an aerial combo attack or hold your post and fire magic projectiles. Use your Wisdom form for more powerful magic attacks.

AYSTATION 2 STRATEG

Oogie Boogie has kidnapped Santa and has taken over Shipping and Receiving! Use the △ button to knock the presents back at Oogie, while trying not to get dragged into the spikes by the conveyor belt. After several presents in the face, Oogie will come crashing down from his

perch, giving you a chance to give him a beatdown. He will then go back up and move to another belt. Run toward the hole where the presents come out from and jump in with \triangle . You

may end up on the wrong lane, in which case you'll have to jump back into the hole. It should take about three falls before Oogie goes down for good. You will get the Magnet Element upon completion.

You'll get a chance to get used to your new lion form as well as the Savannah Map in the Gorge. An easy way to defeat the Chocobo-like Living Bone Heartless is to use the "Rodeo" command and ride them. Next, use the Grand Cross combo to lob their heads off. Sometimes a

Shaman will be riding a Living Bone, so you'll need to mix up your attacks. On your second trip through The Savannah, you will learn the "Dash" ability, making it easier to cross the desert.

At the Oasis, pick up the Oasis Map in the chest and head out to the jungle for a slew of cutscenes. Return to the Oasis and Simba will join your party, plus you get a Circle of Life Keyblade without fighting a boss! With Simba on your team, you can execute the powerful Wildcat to

Proud Roar move and absolutely devastate your enemies.

Shenzi, Banzai & Ed (500 HP each)—The key to this battle is to keep your target on one hyena and try to take it down as quickly as possible, instead of distributing your attacks to all of them. When you see Timon and Puumba's Damage meter taking a hit, call them over with the \triangle

button. The closer you keep them by your side, the better chance you will have to persevere in this challenge.

Scar (1,500 HP)—Possessed by the Heartless, Scar is a formidable opponent. He is too fast to throw magic at, so it's best to store your MP so you can blast him with Simba's Wildcat move. Occasionally he will pounce on you, which you must counter by pressing \triangle . He will also light up and

dash around. Avoid his onslaught and wait until he runs out of breath, then give him a dose of your Limit attack. You will earn the Fire Element after this one.

hollow baseion/space paranoids

After meeting the gang at Merlin's House, the Restoration Site leading to the Postern will now be accessible. The Corridors can be confusing, but it's not an impossible maze. A door at the end leads you to Ansem's Study, where Leon will open the door to Ansem's computer. Thanks to the careless antics of Stitch and Donald, you all get digitized into the *Tron* world!

The first action where you attack the door introduces you to the core concept of this realm—destroy the target, collect the Clusters and do the "Freeze" move. You will find the Pit Cell Area Map on the other side. With Tron in your party, go to the Canyon and activate the Energy Core. As the cubes spin

around the core, break them apart to collect Clusters. When the meter fills up, press the \triangle button and Freeze the computer. Spot the glowing pink cube and destroy it. You have two minutes.

Back at the Pit Cell, access the yellow computer to zap back to Ansem's Study. King Mickey will grant you the Master Form Drive—now you possess all three forms. Also check the chest for the Ukulele Charm (summons Stitch). Access Ansem's computer again and jack into the

Tron world. Now the part you've been waiting for—the Light Cycles! In the first race, whack five other cyclists using the × button. Watch for the "Left" and "Right" warnings—you may have to press the button a couple of times just to make sure the game recognizes your choice. The second race is to escape through the breach in the wall. There are many invaders, but just focus on the turns. Use the O button to guard yourself until you bust through the crack.

A battle will ensue once you activate the computer in the Dataspace room. Defeat the Heartless and collect their Clusters to fill your meter. Once you're topped off, do the Freeze move on the three display monitors on the walls. Tron will learn a new ability and the lift will become active in the Canyon.

Hostile Program (1,000 HP)— Make sure you save in the Communication Room before heading back out to the Hallway to face the Hostile Program. Now that you have Tron's insanely powerful "Setup" ability, you can make the boss rain down Clusters and zap him with the Freeze

move. Attack it while it's incapacitated. The boss will start using lasers when it's low on HP, but after one more attack combo, it's "program terminated!" Back at the "user world" you'll receive the Photon Debugger Keyblade.

After a massive cutscene at Hollow Bastion, it's time to take on a combined army of Heartless and Nobodies. Make sure you have enough Ether and Potions to get you through this phase. This is where your Drive forms will give you the confidence to take on the masses. The whiny

sitar-boy, Demyx, makes his return, except this time he's a tad stronger. Use the Wild Dance command to quickly defeat his 50 water forms. When he's by himself, give him a healthy dose of Donald's Comet and Goofy's Knocksmash. You should also have "Retaliating Slash" equipped so you counterattack every time he knocks you down. After the first wave, Demyx will continually unleash another ten forms that need to be defeated in ten seconds until the battle is finished. You will receive another Blizzard Element—boosting your Blizzard magic to "Blizzara."

With Goofy down, it's just you and Donald. Fortunately, a few *Final Fantasy* warriors will each lend a helping hand as you take on the waves of Heartless. Back at the Crystal Fissure, Goofy will rejoin the action and you'll get another Cure Element. Now your healing powers have been up-

graded to "Cura." Grab the Great Maw Map in the chest and other items. It's probably wise to save your game right here.

Like something out of *Dynasty Warriors*, this battle is just Sora versus a thousand Heartless soldiers! This conflict is more time-consuming than punishing in its difficulty. Simply press \triangle repeatedly to execute the Rising Sun move and slash through the crowd. Occasionally, you

can snag a Surveillance Robot and use the Sparkle Ray command to blast a laser into the crowd. Each special command move will eliminate almost ten enemies each, so use them! After a postbattle cutscene, you will receive another Secret Ansem's Report, a picture and an ice cream. Hope it doesn't melt!

COMBAT TIPS & TRICKS

Use Cover to Your Advantage

The enemy soldiers and vehicles in *The Outfit* are extremely accurate, and seem to have an uncanny knack for hitting you from large distances. For this reason, you should always adopt a "duck and run" strategy. Use buildings, sandbags,

broken vehicles, hills and other obstacles to avoid enemy fire and scope the area for enemies before you move from point to point.

Fortify Your Position

After taking over any outpost, building or location, always make sure that you leave a few soldiers behind to defend the position from enemies. Many times enemy soldiers will attempt to retake a position or location after you have snagged it,

and you may find yourself lacking resources (such as the ability to call in air strikes) that are needed to continue. It's generally a good idea to leave a few machine gun nests and at least one anti-tank gun behind at any Allied encampment.

Destroy Unused Equipment

You should operate under the assumption that any piece of hardware left behind is a potential weapon that the enemy can use against you. If you don't have the resources to man a vacant gun or tank, or if the item is badly damaged and

you don't want to repair it, take time to destroy the hardware to keep it from falling into the wrong hands.

The Right Weapons for the Job

Some weapons may not be suitable against all enemy types. Any bazooka-type weapon is generally useful against heavily-armored enemy weapons such as tanks and anti-tank guns; any machine gun is generally good against large

groups of enemy foot soldiers; and a rifle or sniper rifle is generally useful for precise firing against single targets. Change up your characters every so often and take advantage of their weapon types to get through certain areas more easily.

A Note on Vehicle Control

It may take you some time to get used to controlling your vehicle, especially in the heat of battle when you're being attacked from multiple directions. You may find yourself moving in one direction and firing in a completely different direc-

tion, which can lead to you running into buildings, walls or even over your own soldiers or weapon encampments. Hold down the LB button to lock the turret to face forward and you will be able to aim in whichever direction your vehicle is facing.

Capturing Enemy Weapons

Any enemy weapon, whether it be an anti-tank gun, Panzer tank or jeep, can be captured if you get close enough. This is especially helpful when enemy vehicles are nearby and you find yourself severely outnumbered or low on Field Units (FUs). Instead of trying

to pick off a few enemies at a time and earning small amounts of FUs, simply get close to an enemy unit, capture it and use it against them. Keep in mind that if you are taking over a vehicle that's capable of carrying multiple people and you are running solo, you might not be able to move or fire the weapon without calling in reinforcements.

Accuracy Counts

Shot accuracy won't earn you any extra FUs or any medals in a Campaign game, but it will definitely make things a lot easier when dealing with multiple enemies. When possible, always aim for the enemy's head or center mass; hitting

most enemies with head shots or chest shots will take them out in one or two hits. To increase your accuracy, try to remain stationary and crouch before firing. This works especially well when up against enemy tanks, as you can shoot the gunners that are manning the tank turrets and essentially disable the vehicle from firing.

SINGLE-PLAYER MEDALS

Earning medals in the single-player mode will not only unlock Achievements and contribute to your Xbox 360 Gamerscore, but it will also unlock cheats that you can use during gameplay. Although some of the medal opportunities are obvious and can be found just by playing through the game, some are hidden and not very easy to locate. Here's a list of all of the single-player medals and how to unlock each medal opportunity.

Mission 1

Air Defense After completing

the "Proceed to the Final Base" objective, you will be ordered to call in a Flak Gun. Hop into the seat and shoot down five planes to earn the medal.

Combat Aid

While you're traveling to the

main town and approaching each outpost, ally paratroopers will come under fire. Any time you see an incoming message telling you that Allied

paratroopers are about to land, quickly set up a few machine gun nests nearby to keep them safe from the Nazis. You will need to save at least five of them to earn your medal.

Mission 4

Tank Crew Rescue

Locate the outpost near the southwest corner of the stage and look for a tank crew near the river to the south. Escort them to the outpost and protect them by killing all of the nearby Nazi soldiers to earn this medal.

Reinforcement Rescue

While defending the town, Nazi Stukas will attempt to strafe your reinforcements. Just after the Nazis stop placing cannon cars near the town, head to the southwest entrance and enter one of the anti-

aircraft guns just outside the town's perimeter. Shoot down as many Stukas as you can to protect the troops and earn the medal.

Mission 2

Searchlights Destroyed

There are eight searchlights located in different areas throughout this mission. Destroy them all to earn a medal.

Troop Car Destroyed

After defending the motor pool

and making your way down the train tracks, a train will come and reinforce the Nazi onslaught by dropping off troops. Quickly destroy the passenger car before the

train leaves and more troops arrive to earn a medal.

Mission 5

Allied Rescue

There is a small outpost of Allied

troops near the armory, and you'll be given the opportunity to save them as you approach the outpost. Quickly destroy the Nazi armored car and any troops nearby and save

the Allied troops from being slaughtered to earn this medal.

Panther Tank Capture

Check your minimap for a small, enclosed section of the

road off to the right. Toss a few grenades at the wall to break it down and look for the tank at the dead end to trigger the mission for this medal. Allied engi-

After taking over the second small outpost near the industrial

crane. look for the three anti-tank guns pointing toward the river. Call in troops to help you with two of the guns and take one gun yourself, then de-

stroy as many of the convoy vehicles as possible to earn the medal.

Propaganda Destroyed

After blowing up the wall near the

motor pool, look for a small statue on your left with a golden symbol on top. There are five of these statues scattered throughout the town; locate and destroy them all to earn the medal

Mission 6

Transport Ship Destruction

After securing the armory, head down to

the coast and look for an antitank gun facing the water. Use the gun to sink the three Nazi freighters just off the coast to earn the medal. The ships are some distance away, so aim a little higher than you would normally to hit them more easily.

Submarine Destruction

There is a Nazi U-boat down on the docks; use the Panther tank or place an antitank gun on the docks and use it to destroy the submarine and earn the medal.

Mission 7

Train Destroyed

After you capture the train, you'll see a higher set of tracks near the mountains on your left. There is another Nazi train here that travels back and forth to reinforce the next

area with troops. Destroy the

train to earn a medal.

from the central outpost just before the river, you'll see a small field where Nazi soldiers are fighting against Wehrmacht POWs. There are two waves of Nazi soldiers here that you must kill; defeat both waves to earn this medal.

Mission 8

Fuel Depot Destroyed

When you reach the

opposite side of the river just past the motor pool, you'll see some small fuel barrels near the center camp. Destroy one of these barrels to trigger the medal opportunity, then destroy all 25 barrels to earn the medal. The barrels are

located in different camps throughout the stage, and some are off the beaten path, so look closely for them.

Allied Savior

Allies" objective, you will have a limited amount of resources to fend off the Nazis. There are only 10 replacement anti-tank guns, and if you use any more than that, you will not be able to earn the medal.

Support the Allies and keep the replacement guns down to a minimum by dropping in your own anti-tank guns. Once all of the guns are in place, run up and down the line while the reticule is facing a gun and repeatedly tap the A button; this will rapidly repair any gun that may have taken damage and keep you from losing it altogether.

Mission 9

Howitzer Defense

While vou're defending the antitank guns, you will be given a medal opportunity. You can earn this medal easily by simply placing soldiers at

all of the anti-tank gun locations near the starting point; they will do most of the work for you by destroying any Nazi armor before it gets close. As you earn FUs from shooting down the Nazi planes and destroying armored vehicles, reinforce the camp even more by dropping additional anti-aircraft guns nearby. You must save all of the guns to earn this medal.

Tank Column Destroyed

After arriving at the train station, your fortified positions will be overrun by Nazi troops, and Nazi tanks will attack you as you make your way

back to the armory. You must destroy all of the tanks to earn this medal.

Mission 10

V1 Rockets Destroyed

Just south of the motor pool is a group of V1 rockets; fire at them to trigger the opportunity to earn the medal. To do so, you'll need to destroy a

second group of V1 rockets, which lies near the area just northeast of the radio tower.

Prototype Jet Destroyed

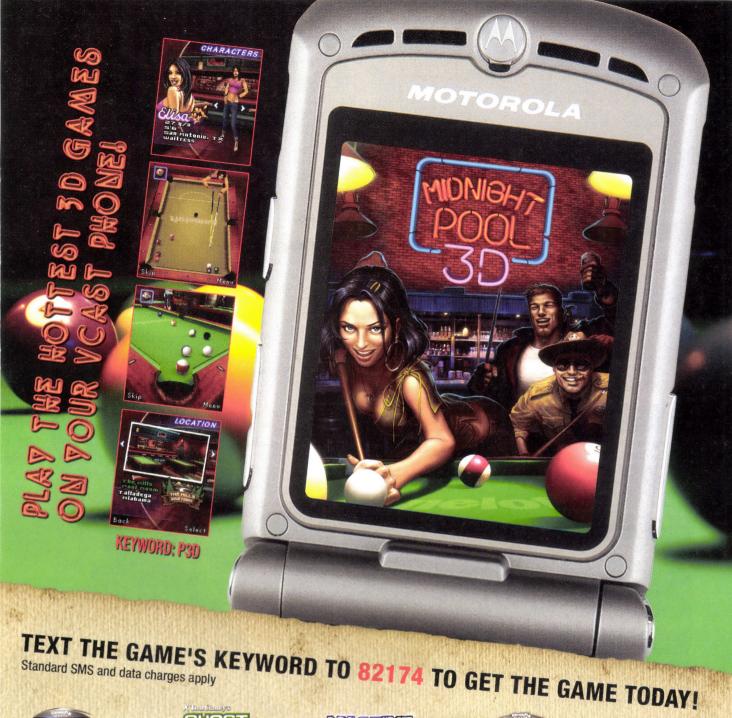

Just after you reach the third outpost

and before you destroy the fourth anti-aircraft gun, you'll see a barricaded road on the left side of the

beach. Break down the barricade and follow the road along to reach a small camp with an experimental rocket. The camp is heavily guarded by several machine gun nests and a nasty Nazi tank, so use discretion when trying to reach the rocket. When the coast is clear and the area has been cleared of enemies, destroy the rocket and collect vour medal.

Mission 11

AA Guns Destroyed

You'll unlock this opportunity by destroying more than six

of the anti-aircraft guns in Mission 11. Locate and destroy all 10 guns to earn this medal. Again, listen for the loud whistling noise and look

for a large explosion as telltale signs of a nearby AA gun. There are two particularly pesky guns that are hard to locate: One is behind the bunker near the central outpost, and the other is on top of the bunker opposite the fortress gates.

Bunker Defense

When you reach the area with

Von Beck's men, you will be tasked to keep Nazi soldiers from mounting an assault by entering the bunker. Take over one of the guns nearby and drop a couple more to mow

down the soldiers on the rooftop. If more than 20 soldiers enter the bunker, you will not be able to earn the medal.

MISSION TIPS

Most of the gameplay in The Outfit is pretty straightforward; your objectives are clearly marked on the map and given to you in the sub-menu. Instead of giving you repetitive information by walking you through the game, we'll answer your questions about the most difficult parts in each mission.

Mission 1: Beachhead

Q: After I capture the Motor Pool and the Armory, I'm having trouble holding on to them and the Nazis keep taking them back over. How can I stop this?

A: Those pesky Nazis have a knack for dropping in reinforcements just after you've taken over some strategic objective. Get into the habit of reinforcing anything and everything that you take over with multiple machine

gun nests, anti-tank guns and anti-aircraft guns if applicable.

Q: I just received an objective called "Proceed to the Final Base," but there are several outposts and enemies along the way. Should I even bother trying to take over these outposts?

A: Absolutely. Not only does taking over outposts give you additional FUs, but it also keeps the Nazis from landing backup troops at any of those locations. The Radio Tower is located off the main road on the way to the final base, and you should definitely overtake this facility as well; the air strikes will help you to destroy some of the armored cars and buildings once you reach the town.

Q: I can't find the church. Where is it?

A: To reach the church, you will first have to locate the town on the far side of the area. You must first repair the broken bridge to reach the town, then you'll have to fight your way through the town to reach the church.

The town is heavily guarded, and you'll have to pound through several squads of enemy troops and vehicles to reach it. If you haven't called in a tank yet, this is a good time time to do so, since you'll need the extra armor to make it through the town safely.

Q: Do I get anything special for completing Mission 1? A: Completing Mission 1 unlocks the .50 caliber machine gun for purchase from your DoD menu.

Mission 2: Into the Fray

Q: I'm having trouble defending the town. Can you give me any tips?

A: Defending the town is no easy task, and there are three steps involved in completing this objective: killing the Nazis who guard the Memorial, destroying the Nazi armored cars and killing the Nazi paratroopers. Start by working your

way around to the left side of the memorial and look for the Nazis to come from the right. Stay behind the memorial and pop out every once in a while to pick them off one at a time until the area has been cleared. Drop a few anti-tank guns on either side to do the dirty work when the armored cars come. If any of your men get taken out while manning a gun, don't be afraid to step up and take a gun for yourself. As if Pumas weren't bad enough, you'll also be assaulted by paratroopers. Save yourself some grief and set up some machine gun nests near the memorial statue to mow down the troops before they get a chance to run rampant through the town.

Q: I can't repair the bridge for some reason. Am I doing something wrong? A: Make sure you are in range of the bridge so that the "repair" option pops up on the screen. You'll also need 250 FUs to repair the bridge.

Q: What's the easiest way to get to the second Nazi outpost?

A: Either hijack the Nazi train or use an armored car to make traveling more safe. Capture the armory along the way to build up your DoD options first, then set up some heavy machine gun nests and anti-tank guns

near the perimeter of the encampment to do the grunt work for you.

Q: What's the easiest way to destroy the Nazi HQ buildings?

A: Capture the radio tower as you approach the HQ buildings, and be sure pick up a Crocodile tank along the way. Be on the lookout for large patches of soldiers near the HQ buildings and either use the

flamethrower on the Crocodile or call in air strikes to destroy all three of them.

Q: What do I get for completing Mission 2?

A: Completing Mission 2 unlocks the Tank for purchase in your DoD menu.

Mission 3: Yo Adrienne

Q: There are too many soldiers near the Nazi blockade and I am having trouble getting close. Can you help?

A: As you round the corner from the armory, you will meet with more resistance. Place a few machine gun turrets here and pick off the soldiers from a distance, using the guns to keep the Nazis occupied while you destroy the

heavy artillery in the area. Look for an anti-tank gun and a .50 caliber machine gun near the blockade. Place soldiers at these locations to slow the influx of enemy troops.

Q: I can't get past the large concrete barrier leading to the next part of the stage. How do I destroy it?

A: The only way to destroy the concrete barrier is by calling in an air strike. The radio tower is heavily guarded and sits on a small hill, so you are definitely at a disadvantage when trying to capture it. Place two or three anti-tank guns

near the farmhouses at the bottom of the hill and let them destroy the anti-aircraft guns and armored vehicles, then slowly snake up to the radio tower. As soon as you take it over, Nazi troops will attack you from behind. Place a few anti-tank guns and machine gun nests facing the barricade and destroy any opposition, then order an air strike on the barricade to clear the path.

Q: How do I get to the church?

A: In order to reach the church, you'll have to fight your way through the town. Capture the motor pool to beef up your arsenal first, then grab a tank and use it to destroy the wall just south of the motor pool to

reach the inner part of the town. Carefully work your way through the city, destroying everything in sight with your tank, and follow your map to reach the church.

Q: Where are the resistance fighters hiding? I can't seem to locate them

A: Upon reaching the church, you will be directed to a ruined building on the opposite side of the river. Continue on past the church and up to the next outpost. Follow the road and repair the bridge to cross the river

and make your way into the next town. The outskirts of the next town are very well guarded, so you'll need to place several machine gun nests and anti-tank guns along the way. Reach the end of the road to complete the objective.

Mission 4: Mortaim

Q: I keep getting strafed by Nazi planes while trying to capture the radio tower. How do I get past them?

A: First, take out the small Nazi troop force near the tower, then use the nearby buildings and cars as cover points. Wait until one plane flies by, then run to another cover point and continue doing this until you reach the tower. Stand

behind the tower while capturing it to keep from being strafed.

Q: Where are the three farms? I can only find one or two of them.

A: The west farm is located near the radio tower, the north farm lies along the railroad tracks on the way to the armory and the south farm is located southeast of the central town. Obliterate all of the Nazi opposition

near each outpost and secure the outpost to complete the "Secure the Farms" objective.

Mission 4: Mortaim continued

Q: There are several directions that I can enter the town from: which entrance should I take?

A: After you have captured the motor pool, you will be able to enter the central town. Enter the town through the southwest entrance; there are minimal troops here and an armored car that you can steal.

Q: I'm really having problems defending the town perimeter. Can you help?

A: This is where things start to get difficult. You'll need to place two or three .50 caliber machine gun nests at every entrance to the town, along with at least one anti-tank gun. Hop into the Nazi tank near the west side of town and prepare yourself for a long battle. Each entrance will be successively attacked by Nazi

troops. Every so often, you will also see a message telling you which direction the enemies are attacking from; quickly locate which entrance the enemy is trying to infiltrate and take them down fast. If too many enemies

get through, they will penetrate the town and you will have a very difficult time trying to maintain control. After the Reinforcement Rescue medal opportunity, Nazi Pumas will start assaulting the town. Be sure to drop additional anti-tank guns near each entrance to help and destroy all of the Pumas to complete the ob-

Q: What do I get for completing this mission?

A: Completing this mission unlocks the 75mm Halftrack and the 57mm anti-tank gun for use from the DoD menu.

Mission 5: Assault on Rochereau

Q: I keep dying when I try to run through the shelling range. Is there a specific path I'm supposed to take?

A: Yes, but you will want to grab one of the Nazi armored cars near the shelling range first. Drive as fast as you can through the next part of the town. When the road splits, take the left path; the right path is a dead end.

Q: Where is Adrienne? I can't find her!

A: You'll have to reach the motor pool first to track her down. After taking back the armory, follow the road to the northwest to

reach the motor pool. On the way, you'll have to fight your way through two waves of Nazi armored vehicles, so you might want to bring a few armored vehicles with big guns. The motor pool itself is also fortified with a

few anti-tank guns and a few armored vehicles, so soften them up by dropping some nearby anti-tank guns of your own before beginning your assault. Now head over to the town hall, which is located on the far side of the stage. You'll have to capture the radio tower and destroy the artillery guns near the tower to approach the town hall.

Mission 6: See the Light

Q: What's the best way to reach the armory? This area is crawling with Nazi troops!

A: Make your way through the town and secure the second outpost. There are two paths to the armory—right or left-and each path is filled with soldiers and machine gun nests. Slink your way around either

side, advancing a few feet at a time and using buildings for cover. Drop an anti-tank gun and a machine gun nest so that they face the armory and let them cover for you; when the coast is clear, run in and secure the armory. Stay on your toes after capturing the armory; Nazi armor will try to retake the post almost as soon as you capture it, and more Nazi soldiers will attack from behind.

Q: Where is the Enigma Machine?

A: There is an officer manning the machine gun near the motor pool that carries the Enigma machine; kill him to recover the machine.

Q: What am I looking for during the "Search the Docks" objective? A: You are looking for the decryption information for the Enigma Machine. If you secure the small outpost just outside the docks,

gaining entry into the base will be easier. Once inside, things get pretty tough. There are three bunkers with machine guns near the entrance, and they will probably get you in a three-way crossfire. Destroy the center bunker

first, then choose either the left or right bunker and use the entry point as cover. Heavy weapons such as the anti-tank rifle or bazooka work wonders here, so you might want to use Deuce to take them down more quickly. Fight your way down to the docks and either destroy or capture the Panther tank to locate the officer with the decryption information; you'll have to kill him to retrieve it.

Q: I can't find the Rotor to the Enigma Machine. Where is it?

A: Near the bottom part of the Nazi base is another officer who carries the final piece of equipment needed to assemble the Enigma machine. Kill him to collect the rotor.

Q: Do I get anything for completing Mission 6? A: Completing Mission 6 unlocks the Crocodile tank for use

through the DoD menu.

Mission 7: Sole Survivors

Q: I need help securing the train station. Am I supposed to do something specific?

A: Here you will be harassed by endless waves of Nazi troops, armor and tanks, so stay inside the train the entire time to increase your chance of survival as you mow down anything in your path.

Capture both the armory

and motor pool along the way to build up and upgrade your resources. Be very careful when you reach the outpost near the train station; there are several heavy machine gun nests, anti-tank guns, troops and even armor that are waiting for you. Your FUs should be pretty high at this point, so drop several machine gun nests and anti-tank guns to whittle their defenses down slowly. Continue following the road to reach the train station, and secure the area by killing the few remaining Nazi soldiers. As soon as you take control of the station, begin placing multiple anti-tank guns and heavy machine gun nests, as the Nazis will try to recapture the station immediately.

Q: I am being told to secure the river bank, but I can't seem to complete the objective. What gives?

A: After you cross the river, you have to destroy the bridge to keep the Nazis from following you. Call in an air strike and

destroy the bridge before enemy tanks can cross. Be warned—if you destroy the bridge and die before you can capture the outpost on the other side, you will not only have to deal with the enemy tanks from the opposite

side of the bridge, but you will also have to pay the extra 250 FUs to repair the bridge and cross it again.

Q: What's the easiest way to secure the industrial complex?

A: In addition to some nasty anti-tank guns, there are several waves of incoming troops and Nazi armor that you'll have to deal with. Work your way from section to section, dropping a few machine gun nests and

anti-tank guns along the way to clear the path.

Q: Do I get anything for completing Mission 7?

A: Completing this mission unlocks the Quad .50 Halftrack and 75mm anti-tank gun weapons for use in the DoD menu.

Mission 8: Vengeance

Q: What's the deal with the "Find the Treacherous Priest" objective? Where is he?

A: This is an ongoing mission throughout the stage. Getting through the first checkpoint may be a little rough, especially since you start with limited FUs, so it might take you some time to wear down the Nazi sol-

diers. Use hit-and-run tactics to secure the area then continue on up the hill. Snag a light armored car from the side of the road and continue on toward the motor pool. After claiming the motor pool, armory and radio tower, and defending the Allies, you will come to a small outpost just before the broken bridge. Reaching this point completes the objective.

Q: Is there anything special I need to know about completing the "Help the Allies" objective?

Not really, other than the fact that you will be here for a short time. When you reach the ridge, you'll

encounter a fierce stand off between Allied troops and the Ratzis. Lend a hand by dropping in several anti-tank guns near the ridge and helping to destroy any incoming tanks or armored cars. Defeat the Nazi onslaught to complete this objective. This is a good place to build up your FUs; you'll need them later on.

Q: Where is the priest?

A: He's hiding in an old church on the other side of town. The city has a north entrance and an east entrance, both of which are guarded by Nazi guns and armor. Take the time to slowly work your way through the

town and place large amounts of anti-tank guns to make short work of the enemy. When the coast is clear, head for the back of the town and look for the church; turn the church into a smoldering pile of rubble to complete the mission.

Q: What do I get for completing Mission 8?

A: Completing Mission 8 unlocks the Calliope and Artillery Strike items to be used with your DoD options.

Mission 9: Crossing Over

Q: I don't have enough firepower to defend the anti-tank guns. What else can I do?

A: Your best bet is to just reinforce the rest of the guns beforehand; this will aid you in shooting down the planes and saving the camp from being overrun.

Q: I've reached the airfield but I can't get to the radar dish. What should I do?

A: Drop several machine guns and a few anti-tank guns near the end of the airfield to keep the Nazis occupied, then make a Rambo-style dash for the dish before more troops

arrive. Head toward the

west side of the airfield and use the stationary planes as cover; you should be able to surprise the Nazis near the dish and kill them while their backs are turned.

Q: What's the easiest way to capture the radio tower?

A: The radio tower is in the center of the city, and as long as it is under Nazi control, troops will arrive continuously. Beef up the area around the tower by dropping a number of machine gun nests to cover you. Place some

near the entrance first and slowly creep over to the tower; when you get close, drop a few more machine guns near the building to fend off troops while you take it over.

Q: Do I get anything for completing Mission 9?

A: Completing this mission unlocks the Panther tank for use in your DoD menu.

Mission 10: Iron Zeppelin

Q: Where are the AA guns? A: There are five anti-aircraft guns throughout this stage, and you'll need to destroy all of them before you can make it to the zeppelin safely. Check your mini-map for their locations.

Q: The airfield is well-guarded by Nazi troops and armor; I can't get close. Where should I begin attacking from?

A: The airfield is definitely the most heavily-fortified area that you've seen thus far; it will take quite some time for you to conquer the outlying troops and vehicles in order to clear the way to the zeppelin. Although you can actually

complete this objective almost immediately, you can make the battle a lot easier by taking over the armory, motor pool and radio tower first. Start by approaching the airfield and following the path outside of the field in a clockwise motion. Capture the motor pool and place three or four anti-tank guns facing the airfield. Nazi armor will continuously drop and attempt to retake the motor pool, so you will need to keep it defended, and this will also give you a steady source of FUs. Continue fighting your way around the perimeter of the base and capture the radio tower and armory to upgrade your weapons. Look for a small outpost near the south side of the field and capture it to complete this objective.

Before you do this, you might want to build up your FUs a bit for the battle at the end of the stage. The easiest way to do this is by simply placing a bunch of anti-tank guns near the motor pool and the clamshell hangars just to the south of the aircraft control tower. There are two dropzones here for Nazi tanks and troops, and the multiple guns will tear up the Nazi armor and fill up your FUs quickly. Since the Nazi tanks continuously drop and you don't really have to do any work, you can sit back for a bit and rake in the points. Bank about 6,000 or more FUs, then take over the strategic objective just to be on the safe side.

Q: I keep failing the mission because I can't defend the zeppelin. What am I doing wrong?

A: The zeppelin is tied down by six anchor points, and you must not let the Nazis destroy them or you will have to restart the entire mission. The Nazis will begin air-dropping tanks at various points around the zeppelin, so you will

need to be on the lookout constantly. Allied forces arrive and provide a limited amount of backup, but you should drop a few more heavy anti-tank guns as soon as you can to keep the enemy under control. Any time you see a piece of Allied equipment get destroyed, replace it immediately to maintain superior firepower. When the tanks have thinned out, the Nazis will begin air strikes. Drop multiple anti-aircraft guns during this time to keep the planes under control. A final wave of tanks will attack after the planes are done, so make sure you have a few FUs left for antitank guns to keep the zeppelin safe.

Mission 11: The Gates of Hell

Q: How do I find the Intel I need from the crash site? The Intel is being held by soldiers near the crash site. Take down the enemies one at a time near the center of the crash site and look for the soldiers close by.

Q: Where are the flak guns located? I can't seem to find them.

A: Some of the guns are hidden behind buildings or in hard-to-reach locations such as the top of a mountain, so keep your eyes peeled for any sign of them. Your biggest cues for locating the guns will be loud whistling noises

and large explosions emanating from the barrels.

Q: How do I destroy the fortress gates?

A: To destroy the gates, you'll need to capture the tower on top of the bunker opposite the gates. The bunker is lined with anti-tank guns and anti-aircraft guns, so you'll have to take those out before you proceed. Drop a few anti-tank guns of your own at the bottom of the hill and let them soften up the Nazi artillery for you, then move in and secure the tower when the coast is clear. After you capture the

tower, several Nazi tanks will attack you. Line the bunker with anti-tank guns and wait out the fight, then move close enough to the fortress gates to call in an air strike and destroy the gates.

Mission 12: The Fortress

Q: How do I secure the airfield?

A: Your main concern should be the three very large anti-tank guns near the entrance that are protecting the airfield. Destroy the right and left guns first (one at a time), then take out the third and final gun in the air-

field itself before moving on. There are several tanks to watch out for, but you can take them down rather easily by making a run for the tower and capturing it when the tanks drive off. After you capture the tower, Allied troops will reinforce the area with guns and tanks to help you.

Q: Where is the armored train?

A: Follow the path around from the airfield and up toward the train station. Watch for small crews of troops and guns along the way and drop a few anti-tank guns near the station to deal with the tanks that are de-

fending the train. Watch for one final anti-tank gun on your left before you reach the outpost, then secure the outpost to capture the train.

Mission 12: The Fortress continued

Q: How do I destroy General Morder?

A: To kill Morder, you'll have to get to him first. Use the train to push the giant artillery gun through to his fortress and to destroy all of the tanks and artillery in the main yard. Dismount the train and hop into the artillery car to destroy Morder once and for all!

MULTIPLAYER MEDALS

The medals you earn in multiplayer action are all based on cumulative accomplishments, as opposed to the specific tasks that you'd perform to earn a medal in single-player mode. Here's a list of the available multiplayer medals:

Wounded in Action—Awarded for an average lifetime shorter than 30 seconds in Ranked Quick Match games.

Master of Capturing—Awarded for capturing more than 10 objectives in a single Ranked Quick Match game.

Great Score—Awarded for achieving a score greater than 350 in a single Ranked Quick Match game.

Lightning Victory—Awarded for achieving victory in less than two minutes in any Ranked Quick Match game.

Prisoner of War—Awarded when your total number of losses exceeds 200 in Ranked Quick Match games.

Victories Keep Piling Up—Awarded for winning 500 Ranked Quick Match games.

Persistence Counts—Awarded for dying 1,000 times in Ranked Quick Match games.

Infantry Killer—Awarded for 1,000 infantry kills in Ranked Quick Match games.

Vehicle Killer—Awarded for 200 vehicle kills in Ranked Quick Match games.

Emplacement Killer—Awarded for 250 emplacement kills in Ranked Quick Match games.

Great Shooting—Awarded for accuracy greater than 40% in a single Ranked Quick Match game. **Marksman**—Awarded for accuracy

greater than 25% over your Ranked Quick Match game career.

Feared—Awarded for more than 15 enemy player kills in a single Ranked Quick Match game.

Clear Winner—Awarded for victories totaling 1,000 Command Points in Ranked Quick Match games.

Guns Blazing—Awarded for an average score of over 18 per minute of play in Ranked Quick Match games.

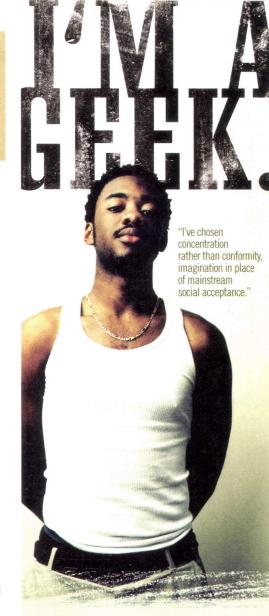

Focused Fire—Awarded for killing enemy players at a rate of 1.7 or greater per minute of play in Ranked Quick Match games.

MULTIPLAYER WEAPON UPGRADES

You can also earn weapon upgrades in multiplayer games, but the requirements for unlocking them are all based on the medals you've earned in multiplayer games.

Name	Weapon	How to Obtain
Deuce Williams	Bazooka	Starting Weapon
Upgrade #1	Heavy Bazooka	Earn the "Great Score" medal
Upgrade #2	Anti-Tank Rifle	Earn the "Emplacement Killer" medal
J.D. Tyler	Light Rifle	Starting Weapon
Upgrade #1	Rifle	Earn the "Great Shooting" medal
Upgrade #2	Sniper Rifle	Earn the "Marksman" and "Feared" medals
Tommy Mac	Grease Gun	Starting Weapon
Upgrade #1	Submachine Gun	Earn the "Lightning Victory" medal
Upgrade #2	Light Machine Gun	Earn the "Victories Keep Piling Up" medal
Hans Von Beck	Sturmpistole	Starting Weapon
Upgrade #1	Panzerfaust	Earn the "Clear Winner" medal
Upgrade #2	Panzerschreck	Earn the "Vehicle Killer" medal
Nina Diederich	Light Rifle	Starting Weapon
Upgrade #1	Rifle	Earn the "Master of Capturing" medal
Upgrade #2	Sniper Rifle	Earn the "Focused Fire" medal
Victor Morder	MP44	Starting Weapon
Upgrade #1	MG34	Earn the "Infantry Killer" medal
Upgrade #2	MG42	Earn the "Guns Blazing" medal

Strategy Guide by Josh Engel

dama

nyone who pays attention to the kind of games that find their way from Japan to the United States knows that describing them as "unique" is a gross understatement. (Katamari Damacy, anyone?) So it should come as no surprise (to those who've been paying attention, anyway) that the latest Japanese import to find its way to TIPS & TRICKS headquarters is a mixture of real-time strategy, action and...pinball. Yes, pinball. In fact, the best way to describe Odama would be to call it an organic pinball game. Because while you're smacking the metal sphere around with your flippers, there's a bitter civil war happening at the same time, and in the same place. Your task is to lead the Yamanouchi clan—with the help of your Odama (pinball)—to victory in medieval Japan. But you'll have to be much more than a pinball wizard to emerge victorious. In fact, relying strictly on your pinball skills will bring nothing but hurt to your clan. You must also employ strategic planning, military precision and on-the-fly decision making if you're going to survive the battle of the Odama.

Oh, there's one more thing you'll need: good enunciation. That's because in Odama, you'll use voice commands (with the help of your GameCube microphone) to communicate with your troops on the battlefield. So clear your throat, get comfortable and get ready to multitask like you've never multi-tasked before.

BACCLEFIELD BASICS

The Odama

As you've probably guessed from the title of the game, the Odama is the most important element in your battle plan. You'll not only use it to knock down houses and to collect power-ups, you'll also use it as a

weapon. Your pencil-necked enemies are no match for the two-ton lead Odama rolling over them at 20 mph. Of course, like a great philosopher once said, "With great power comes great responsibility." While you throw your head back for an evil laugh as you plow through the enemy, remember that the Odama can do just as much damage to your own troops. You'll also find that sometimes sacrificing a few for the benefit of many is a necessary strategy, especially when you've got a good stable of reserves waiting to unleash their fury on the enemy.

What the Flip?

Without your flippers, the Odama is nothing but an outof-control wrecking ball. With them, the Odama is a multifunctional tool that will give your army the edge on the battlefield. Just like in regular pinball, you'll have to learn

some basic flipper physics so that you'll be able to direct the Odama exactly where you want it to go.

If you launch the Odama from the outside (skinny) edge of the flipper, the Odama will come off rather hot and at a very steep angle in the direction the flipper is pointing (so if the skinny edge is facing left,

the Odama will squib off to the left). Conversely, activating the flipper when the Odama is on the fat part will result in a slower, straighter shot. The vertical shot (one that goes straight up) is probably the most difficult shot to master, so don't expect to hit it perfectly straight every time. And remember, the closer the target, the easier it is to hit. Just don't wait for enemies to get too close or you run the risk of your base being invaded.

We Have Liftoff

You start each battle by pulling and releasing the plunger, which sends the Odama onto the battlefield and signals the beginning of the fight. You can choose the direction in which the Odama will be

launched, so pay attention to your surroundings before just launching it straight at your enemy. Sometimes a wellplaced Odama launch, like at the beginning of Kuruwa Plains I, can give you a slight head start on your enemy.

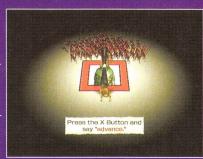

Voice Commands

Voice commands are what differentiate your army of battle-hardened troops from a pack of wild hyenas. By issuing commands to your squad, you can rest assured that your army will work with a common goal and pur-

pose to represent the epitome of "military precision."

But you'll have to actually learn the voice commands before adding them to your repertoire. In order to acquire new voice commands, smash the command houses with rotating scrolls above them. You'll have a

chance to see what the newly learned command is and have the opportunity to practice using it before being thrust back onto the field of battle. Most commands are placed in easily accessible areas, but some command houses are hidden off the beaten path and may take some good aim (and a little luck) to hit with your Odama.

There are some commands you'll use constantly, some you'll only use in specific scenarios and some you'll probably forget you even know. You can always pause the game and go to the Command

Scroll for a little refresher on which commands you've actually acquired. Hopefully "Press forward" will become part of your vernacular, while "Fall back" will be something you never have to utter.

Voice Command Anecdote: This wasn't confirmed by Nintendo, but I found that when I was particularly forceful when giving a command, my troops were often more responsive. Just make sure

around who might take offense at your (ahem) colorful language when you're really fired up and need to get your point across.

Reserves

You'll notice at the beginning of each battle that you've got a limited number of reserves in your army. When you deploy your troops, they emerge from your base in platoons of 15. But don't just automatically deploy all your troops at the

beginning of a stage. Sometimes you'll want to hold some back as reinforcements, and sometimes you won't want to risk losing too many troops too quickly in a battle and leave yourself defenseless.

Morale

Morale is very important, because it determines how hard your troops are willing to fight, and also how likely they are to obey your orders. If morale gets too low, your troops will lose faith in you and your voice

commands will fall on deaf ears. You can boost morale with certain power-ups and by deploying reinforcements in the heat of battle (another good reason not to send everyone into battle all at once).

Be careful, though, because you can just as easily hurt morale if your leadership skills aren't up to the task. Giving an inappropriate voice command, not sending enough troops into a battle and

poor planning can all cause your army's morale to go down. You'll know when morale is dangerously low when your troops start questioning your orders, and their voice balloons have red text instead of the usual black. There are two ways to quickly give your morale a little boost. The easiest way to get your troops back on board is to deploy more troops. Always try to keep at least a couple dozen reserves, just for this purpose. The other way to get your guys fired up again is to launch a rice ball in their general vicinity and then order them to "rally" on it. The energy boost will make your men forget about their aching feet and the fact that they're outnumbered three-to-one, and will inspire them to fight until there's no fight left.

Ninten Bell

The Ninten Bell is the center of your universe. With that said, you need to do everything in your power to protect the bell. More importantly, you need to do everything in your power to get it

through enemy lines in order to win each battle. Lucky for you, the Ninten Bell isn't just dead weight; it can also come in very handy.

continued

27

Ninten Bell continued

While on the surface the Ninten Bell may look defenseless, it can actually be the key to victory more often than not. When you hit the bell with your Odama, it rings, and the subsequent sound wave

will—at the very least—knock down all enemies that are within the "blast radius." As an added bonus, when you've collected enough hearts, the bell will glow white. Now when you ring it, you activate the Heavenly Odama, which is the best kind of Odama in the whole world! (See "Power-Ups".)

One thing you'll notice is that the Ninten Bell (and its carriers) won't let something like a flowing river stand in its way. This is an important fact to remember, because you don't want to leave the bell defenseless on the

"wrong" side of the river while your troops watch helplessly, unable to cross. And never let the Bell get pushed back too far. If it gets forced back below your flippers, you've lost the battle.

Tilt!

No pinball game worth its weight in quarters would be complete without a tilt function. While anyone who's played a pinball game in an arcade knows that tilting the machine usually ends your game, it's quite

the opposite in *Odama*. In fact, you'll find that tilting the board is the thing you'll be doing most often as you fight your way through battle after battle. For example, you can "guide" the Odama to a particular flipper or toward a power-up that could really come in handy. You can also influence the path of the Odama so that it runs over a group of enemies, or even so that it sits still in a corner (or up against a flipper), enabling you to concentrate on one task at a time. (This is especially helpful when things get frantic right in front of your base.)

POWER-UPS

On every battlefield, you will find various items that can spell the difference between glorious victory and bitter defeat. You'll notice houses strewn about each board. Use your Odama to destroy them, and you'll be rewarded with one of several power-ups. Remember, though, you must run over the object itself to get the benefit of that specific power-up.

Multi-Rally

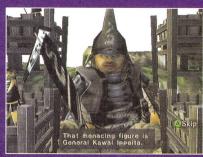

Some battles will call for you to use the "Rally" voice command to get your troops to perform a specific task which is directly related to attaining victory. Usually you only have to rally one time in order to get done

what needs to get done, but sometimes—like on Kuruwa River III and the Spider Temple, for example—there is more than one rally spot. In the interest of saving time and fighting efficiently, sometimes it's a good idea to do what I call a "multi-rally"—that is, rally to two different spots at the same time. Of course, pulling troops away from the Ninten Bell and off the front line can (and probably will) halt your progress briefly, but that small interruption will be worth it in time saved. Just make sure when you multi-rally that you've got enough troops still protecting the Ninten Bell.

A General(s) Note

You'll notice in some battles that you'll ultimately be squaring off against a general at the end of the stage. While your pre-battle briefing may instruct you to defeat said general in order to win, that's not always

the case. In fact, the only battle in which it's absolutely necessary for you to bring down the general is in the very last fight. Other than that, usually all you need to do is get the general out of your way in order to pass through the gate and on to the next battle. So you probably will have to knock him down once or twice in order to reach your goal, but don't waste too much time or effort in trying to defeat him. Of course, if you feel up to the task and have plenty of time left in the day, there's nothing more gratifying than watching a mighty general go down for the count. It's just not mandatory.

Green Orbs

The green orb is probably the most important power-up you'll find, because it unleashes the fury of the Odama. After running over an orb, your regular old Odama glows green

and becomes a Heavenly Odama. It's heavenly because it won't hurt your troops when it runs over them, and it will "enlist" any enemy troops it runs over, instantly adding them to your own reserve.

IMPORTANT ITEMS

Almost every battle will feature at least one item that is either necessary or can be very helpful in the battle you're currently facing. Here are some of the items you may come across in vour travels.

Floodgates

These are usually necessary to both allow your troops to cross a river and to keep the enemy from infiltrating your base. They're usually activated by hitting them with the Odama.

Bumper

There are several instances in which you'll need to rally your troops to a specific spot in order to erect a bumper. This is usually a required task,

but it's one that can be done very quickly and doesn't require a large group.

Ladder

Some ladders you'll have to knock over in order to cross a body of water, while others you'll have to carry and put in place in order to climb to higher

ground. Both require you to rally your troops.

over a heart on the battlefield, you will bolster the Ninten Bell carriers' fortitude and inspire them to carry on, even in the face of imminent danger. Also, if you collect several hearts, the

When you run

Ninten Bell will glow white. The next time you ring the bell, the Odama will become Heavenly for a brief amount of time.

Hearts

Running over a barrel gives you a rice ball, which can be used in one of two ways. If you launch a rice ball in the vicinity of a group of enemies, they'll be distracted by the free grub, leaving themselves

ly low, launch a rice ball to a safe area and rally your troops to it. You'll get a morale boost, although you might lose some ground on the front lines. But like they say, an army travels on its stomach, so don't neglect your troops.

Rice Ball

vulnerable to attack. If you notice that your troops' morale is exceptional-

All battles in Odama are won or lost in a single day, although some days are longer than others. You can extend the day (think of it as "manual daylight savings") by snagging an

hourglass, which adds 50 seconds to the timer.

Flippers

When it comes to war, more of something is usually better. Unless, of course, you're talking about deserters. In certain battles vou'll have the opportu-

nity to control four flippers instead of the usual two. But your enemy will control them at first, so you'll have to rally your troops to each flipper to gain control. Just remember to be extra cautious when you don't control all the flippers on the board.

Catapults

Another item you'll want to gain control over is the catapult. When you don't control a catapult, your enemy will shoot large boulders in your general direction.

But when you do control a catapult, your computercontrolled troops can shoot said boulders themselves (hopefully at your enemy).

The real key to success in Odama is being able to maintain control of a lot of different things at once. If you can keep all of the above information in mind while you play, you'll find it easier to keep your priorities straight as you go for the win!

ega Man has been doing battle against Dr. Wily and his legions of robot minions for almost 20 years, ever since his first appearance on the Nintendo Entertainment System way back in 1987. Now, Capcom has returned to that original game and given it a complete overhaul, including a shiny new coat of graphical paint, for the PSP. Mega Man: Powered Up delivers new visuals, new stages, new bosses and tons of replay value, the latter due to an incredibly versatile construction mode that lets you design your own stages. If you're any kind of Mega Man fan, you need this game. And if you're not a fan, check it out anyway; it's a fantastic example of 2-D platforming action, a genre that's sorely lacking on the PSP. In this guide we'll show you how to unlock all of the bosses (and an even more powerful version of Mega Man). We'll also give you some cool tips for getting to Dr. Wily and beating the game without breaking a sweat.

MEGA BASICS

Mega Man is a powerful combat robot with the ability to steal weapons from his defeated enemies. At the start of the game, you'll be able to enter the eight stages in any order, but each of them is home to a robot boss that's weak against a particular

weapon. If you attack a boss without the right weapon, you'll be in for a much harder battle, in most cases. Determining the best order to progress through the game can make things a lot easier for Mega Man.

Use this chart if you're having trouble defeating any of the bosses. It shows which weapon each boss is weakest against, as well as the weapons you'll earn for defeating them. Continue reading the guide to get more detailed strategies for defeating each of the bosses.

Dr. Wily	Multiple	N/A

WAYA THE COURT

This section will give you some pointers for getting past the roughest sections of each stage as well as defeating the robot boss waiting at the end. The order of the stages presented here is what I consider to be the best route through the game. You can, of course, tackle the eight boss stages in any order you like, and all of the bosses can be defeated using just the Mega Buster.

Bombman Skup

high lad-

Don't bother jumping for this high ladder—you'll need to return here as Gutsman, who can create a block to jump from and reach the ladder.

Bombman's stage is possibly the easiest in the game, with no really challenging sections. There are a lot of these blocks scattered throughout the stage—you need the Super Arm to lift and throw them into enemies, although the Mega Buster works just as well.

There's a construction pack locked away behind those oil blocks. (The construction packs give you access to more enemies or scenery in construction mode.) Use the Oil Slider (as either Mega Man or Oilman) to bust through them and claim the prize.

BOSS: BombmanWeakness: Fire Storm Weapon Earned: Hyper Bomb

likes to jump around a lot, but he rarely tries to jump into Mega

Man. He aims his bombs so they land where you're standing. They're slow, and can be easily avoided by jumping over them or running to either side before they land. Keep a constant stream of fire on Bombman and you'll defeat him easily. Now Mega Man can use Hyper Bombs, allowing him to toss bombs at enemies and destroy certain blocks (the ones that are marked with bomb icons).

Here's another one of those ladders that seems to be misplaced. Mega Man can't reach it...but Cutman can use his ability to jump between walls to get up there, so bring him back here after unlocking him to get into that hidden

These drop lifts are the toughest part of this stage. Watch for the breaks in the line, and jump to avoid being dumped by the lift platform. You'll need perfect timing here...especially on the final set of lifts, which require you to jump between three moving platforms.

130

This extra life heart is blocked on the left by a pit of spikes. To get it, use the Fire Storm weapon on the tanks of oil on the right side to destroy them.

<mark>8088:</mark> Gutsman

Weakness: Hyper Bomb **Weapon Earned: Super Arm**

Gutsman uses his brute strength to pull chunks of the ground up and toss them at Mega Man. He'll also jump into the air and come

enough to knock Mega Man on his blue butt for a few seconds. He usually follows this up by throwing his load of bricks your way, so you'll want to be in the air when he shakes things up to avoid falling. Watch for Gutsman to burrow into the ground as wellhe'll attempt to pop up under

Mega Man, so stay on the move to avoid this. Hit him with your bombs when possible to finish him fast. With the Super Arm, Mega Man will be able to lift and toss the blocks that are marked with a stone icon.

You'll need to come back as Bombman to blast the blocks in the upper left here. Although Mega Man can toss bombs himself (with the Hyper Bomb), only

Bombman can heft them with the precision needed to lodge one near these blocks.

It's hard to spot them, but the floor blocks on the left end of the middle platform here are made of snow. If you bring Fireman back here, he can melt right through

and drop down below to grab a construction pack!

BOSS: Cutman

Weakness: Super Arm **Weapon Earned: Rolling Cutter**

Cutman likes to jump around—a lot. The trick to defeating him is learning to control his mad jumping, which is actually pretty easy. First, use the Super Arm to grab the two blocks in the room and throw

them at Cutman to soften him up, and also clear the area of obstacles. Now, switch to the Mega Buster. When Cutman is hit, he'll leap toward Mega Man. You can easily run beneath him to avoid being hit. Just keep repeating this and you won't have to worry about Cutman's jumping attacks, because your movements will control the way he jumps. His Rolling Cutter attacks have a boomerang effect, so be sure to dodge them as they return to the boss robot. Mega Man gains the Rolling Cutter for defeating Cutman. This weapon arcs out in front of Mega Man and can hit multiple enemies at different heights.

You'll encounter vanish blocks for the first time during this stage (if you're following the recommended order). These blocks appear for a couple of seconds before disappearing. Watch their pattern and then quickly nav-

igate across them to reach the next area

You'll need to slide here to reach the right-side path. Mega Man didn't learn to slide until his third game on the NES, though. Powered Up gives him that ability two games earlier...although you have to beat Dr. Wily to earn it.

BOSS: Elecman

Weakness: Rolling Cutter **Weapon Earned:** Thunder Beam

man's pattern is very easy to learn. He alternates between

his Thunder Beam low and high. If you're on one of the blocks in the room, you'll need to jump over all of the projectiles. If you're on the ground, the high beams will pass harmlessly overhead. Elecman's second attack calls down lightning from above. You'll see him charging up for it, so stay on the move to avoid being hit.

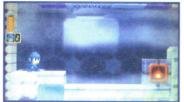

You won't be able to collect this extra life heart until you return to this stage as Iceman himself. He can use his Ice Slasher to freeze

the flying Pengs and jump to the platform. The Ice Slasher doesn't have the same effect when Mega Man

uses it.

Bring Fireman here to melt through the snow blocks in the floor and access a hidden area.

BOSS: Iceman

Weakness: Thunder Beam Weapon Earned: Ice Slasher

Iceman fires three Ice Slasher shots at a time. If they're not all in a line, he'll be mixing them up by jumping as he shoots, creating a wall of projectiles at different only need to

hop over the lowest one and let the others pass by overhead. His pattern isn't hard to learn, but there are other factors that conspire to make this a somewhat tough battle. The slippery floor will mess with your footing—try not to move around too much to avoid losing control. Iceman also tends to move from one side of the room to the other, but he's pretty slow so he's easy to avoid.

Use the Ice Slasher to freeze the fire column, then jump onto it to reach the extra life. The Ice Slasher is extremely handy throughout this stage for its ability to stop the pillars of fire, eliminating their threat for a few valuable seconds.

The section near the end of the stage, with the constant stream of Killer Bullets and the small platforms, can be tough. Getting hit on one of the small platforms will send Mega Man plummeting to his death. Keep your Mega Buster firing to ex-

plode the Killer Bullets before they're within range, and keep moving to clear this tricky section.

BOSS: Fireman

Weakness: Ice Slasher Weapon Earned: Fire Storm

Fireman has a very basic pattern. He shoots his moves around the room,

generally staying on the ground. He'll also create a wave of flames that moves along the ground. All of his attacks can be easily jumped over. He's one of the easiest bosses in the game to defeat—if you use the Ice Slasher, it's possible to keep him completely locked down and never even give him the opportunity to make an attack!

The sections of oil-covered ground throughout this stage will make Mega Man slip and fall down if he tries to run across them. The only safe way to traverse these slicks is by jumping, landing, and then jumping again. Enemies who attack with fire can set these

oil slicks ablaze—don't be caught standing on one when it lights up!

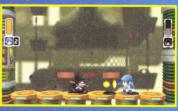

Blocks like this one (with a large black square in the middle and a metal nub on one side) can be moved by Elecman. You'll need to unlock him to access areas that require the moving of these blocks.

DE

Gutsman can break the small brown blocks that have cracks in them. If you're playing as Gutsman and see some of these blocks, jump on them (or jump up into them, if they're above your head) to smash through.

3055: Oilman **Neakness:** Fire Storm

leapon Earned: Oil Slider

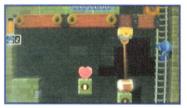

fight by leaping across the screen to land right where Mega Man is standing. Run to the right to avoid this. He attacks by jumping in the air and sending

three globs of oil at Mega Man. You can keep from being hit by running left or right. The oil stays on the ground and will cause Mega Man to slip if he runs over it. After attacking, Oilman will run toward Mega Man, jumping at the last second to land in the far corner. Simply run beneath him and you won't get hit. Oilman will also use the Oil Slider to zip across the screen quickly—jump over him to avoid this attack. The Fire Storm puts a real hurt on Oilman; you can use it to almost completely shut down his attacks by hitting him, waiting for his temporary invulnerability to wear off, then hitting him again and repeating until he's defeated.

Count blocks have a three-second timer that activates when they're jumped on. When the timer runs out, the block explodes. You don't want to be standing on it when this happens, so jump onto the block, then jump to someplace safe and wait out the explosion.

Shoot the pendulum to get it swinging, then jump onto it to reach the extra life heart here.

Here's a tip for dealing with Sniper Joe. If you stand right next to him, Mega Buster shots will bypass his shield and hit him. It makes defeating these guys a lot easier, since you don't need to wait for them to raise their shields. Of course, once you have a good collection of weapons,

you'll find that many of them will ignore the shield at any distance.

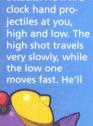

BOSS: Timeman

Weakness: Ice Slasher **Weapon Earned: Time Slow**

Timeman has two attacks. He'll fire clock hand prohigh shot travels the low one

also slow time down for Mega Man, while he still moves around at normal speed. However, his attack pattern is easy to avoid, and Ice Slasher does a lot of damage to him. If you want to make the game a bit easier, try going after Timeman first—you can then use Time Slow to slow down any part of the game that's giving you trouble.

When you've defeated all eight of the boss robots, the path to Dr. Wily becomes available. These stages are extremely short and shouldn't be any trouble for you by this point, so we'll just focus on the best methods for defeating the bosses.

Devil

Before opening its single eye and firing a projectile at Mega Man, the Yellow Devil breaks itself into a multitude of globs that fly across the screen

and reform on the opposite side. There are 15 chunks total, and each one will either force you to jump over it to avoid being hit, or stay put and let it pass overhead. Consult the following chart to learn the pattern, stand-

ing still when it says "high" and jumping when it says "low." When the boss reforms and opens its eye, hit it with the Fire Storm for maximum damage.

1—High

2—Low 3—High

5—High

7—High 8—Low

9—High

10—High 11—High

14—High

This robotic orb can put up a verv tough fight until you've got a lock on its patterns. When it first appears, it's

protected by a bubble that shields it from all damage. You'll need to destroy the bubble before you can harm the orb. You'll be able to get a single hit in before the bubble reforms around the orb. Use the Super Arm to throw blocks at the boss—they'll decrease the bubble size dramatically. Stand in the corner when the boss is moving around the screen.

When it stops in the middle of the room, it will fire a laser into the ceiling. Watch for the falling dirt to determine the location of

the falling blocks, and get out of the way-they'll destroy Mega Man with a single hit if they land on him! Next, the boss will direct its laser downward in a sweeping arc across the ground. Run and jump on a block to avoid being hit, then use the Super Arm to throw the blocks at the boss. Repeat this pattern until you've won.

Copy Robots

Before progressing. Mega Man will now have to fight and defeat copies of all eight robot bosses. Each teleporter in this chamber leads to one of the bosses. By now you should be familiar with

the attack patterns of each boss and be able to eliminate them using the proper weaponry. It's a good idea to stock up on extra lives before tackling this stage, as eight boss fights in a row (without any way to regain health between them) can take guite a toll on poor Mega Man's lives. Here's a chart that shows which boss is behind each teleport pad:

- **Fireman**
- **Timeman**
- **Elecman**
- **Cutman**
- **Iceman**
- Gutsman
- **Bombman**
- <u> Oilman</u>

When you've defeated all eight copy robots, you'll next have to face a copy of Mega Man! He's got access to all of the weapons the real Mega Man has, and he'll switch them up regardless of which one

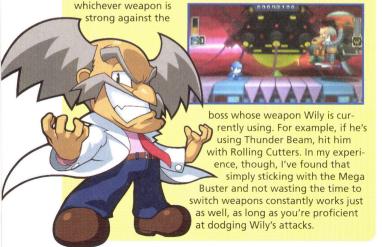

you're using. This is a change from the original game, where the copy would use whatever weapon you selected. The best strategy here is to avoid the copy and use the Mega Buster to keep hitting him as you move around the room. Most of his attacks come in low enough to jump over easily.

Dr. Wilv

Wilv's tank employs all of the boss robot weapons against Mega Man. Wily will choose each weapon randomly, and then use it for several attacks before switching to the next one. Avoid his at-

tacks and hit his cockpit with the Mega Buster until the tank explodes. Now Wily brings out his final weapon—a flying saucer that still has all of the boss weapons intact! Wily will move up and down, firing different weapons as before. The Mega Buster will still work against Wily, but you can also use

377301211111

Whenever you find extra lives within a stage, you take them with you even if you use the "Escape" option to quickly exit the stage. Using this trick, you can stock up on extra lives quickly before tackling the tough final stages. Two

stages in particular have extra lives right near the beginning. On Fireman's stage, if you have the Ice Slasher you can freeze the fire column and grab one. On Iceman's Stage, play as Iceman and freeze a Peng in midair to create a block to reach the extra life on the ledge.

All eight boss robots are playable characters in Mega Man Powered Up! To unlock each of them, you'll need to defeat the boss using only the Mega Buster. When you've got a boss robot unlocked, you'll be able to select him at the

Player Select screen. Each boss robot has special powers and attacks that aren't available to Mega Man, and they can each reach hidden areas or clear out certain types of blocks as well. Additionally, when you're playing as a boss robot on his own stage, the enemy there will be Mega Man C!

Clear the game at the Normal difficulty setting to unlock the ability to use Mega Man C! This "powered up" version of Mega Man is stronger than reqular Mega Man. Hold the Fire button to charge up the Mega Buster and un-

leash devastating projectiles that plow through any enemies in their path! Mega Man C can also slide by holding Down when you press the Jump button. This move will let Mega Man travel through narrow openings that are not normally accessible on foot.

You might be wondering why this strategy guide doesn't go into much detail about the Construction Mode items located throughout the game, the Construction Mode itself or the Challenge Mode stages. Don't worry; we haven't

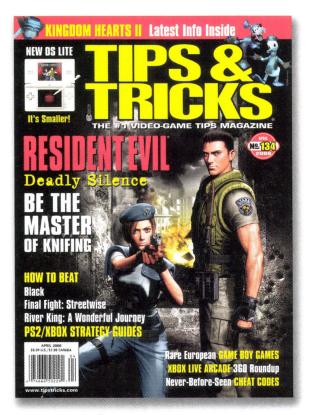

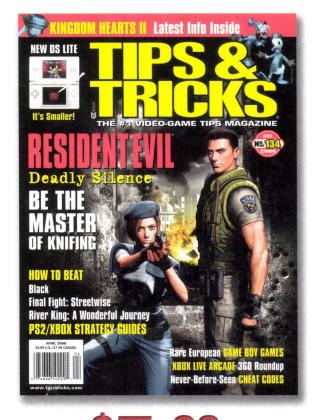

forgotten about these cool aspects of the game. Instead, we'll be covering them, and more, in a new monthly column starting in the next issue that will cover all things Mega Man. So check back next

month, when we'll tell you how you can download an exclusive TIPS & TRICKS stage, created using Construction Mode. We'll also bring you more tips and tricks for Construction mode in the coming months!

Sonic Riders is a hyper-fast racing game with a lot of secrets to discover. Unfortunately, we didn't have enough room in this issue to give you the full lowdown, so Sega provided us with the following quick tips to help you.

With careful timing, it is possible to cross the starting line at the exact instant when the electrical barrier disappears. If you can pass the starting line at just the right time without dropping speed, you'll get a mini-turbo boost that can give you a head start over your opponents.

Speed Type characters like Sonic and Jet can take a shortcut over the crossroad in the last half of Metal City by grinding this rail in the air.

In Splash Canyon, keep your eyes peeled for a waterfall on the left side of the course. There's a ramp hidden behind it which you can use to launch your character into a shortcut with accelerator rings.

A huge train blocks the track in Metal City, but that's not a problem for Power Type characters like Knuckles and Storm. Check out these photos of Knuckles knocking the train out of his way!

In the Egg Factory stage, watch for the corner where you can see the core of Eggman's factory. There's a section of the wall on the right side which can be broken open by Power Type characters, revealing a hidden shortcut.

If you successfully complete all of the stages up to Stage 5, you will unlock several secret characters, including Cream and Rouge!

When you successfully complete the Story Mode, you will be able to obtain several new types of Gear, including some unusual racing vehicles!

The San Andreas Chronicle Pat Reynolds, Editor

Welcome to *The San Andreas Chronicle*, a monthly column that follows Carl "CJ" Johnson's path through the state of San Andreas in Rockstar Games' *Grand Theft Auto: San Andreas*. This month, we're taking an in-depth look at the gang war mini-games in which you can participate at a couple of points during the game.

GANG WARS REVISITED

During our walkthrough of San Andreas some time ago, we briefly covered the opportunities CJ gets to wage war against the rival gangs in Los Santos. This month, we'll give you a much more in-depth look at this part of the game, with detailed information on when, how and where to escalate the violence against the other gangs, taking their territory and earning fat payoffs in the process.

What Are Gang Wars?

Gang wars are battles over Los Santos territory that can expand a gang's holding while taking land away from another. In Los Santos, there are two other major gangs aligned against CJ's gang, the Grove Street Families. These are the Ballas and the Vagos. Generally, gang wars are initiated by CJ when he attacks members of a rival crew in marked territories on the map. However, rival gangs will sometimes attack your territory, giving you the choice to go defend your land or lose it to the other outfit.

When Can I Participate in Gang Wars?

You'll be able to initiate gang wars at two times during the course of *GTA*: San Andreas. The first time comes early on, after you complete the mission called "Doberman." The second opportunity for gang wars won't come until very late in the game, just after the "Homecoming" mission. It's important to note that once you leave Los Santos for the first time, the gang war option goes away, regardless of the results of your efforts, and it won't open up again until very late in the game.

Why Should I Participate in Gang Wars?

The main reason to take part in the gang wars is for advancement of the story-line. You'll need to control a large part of Los Santos for the Families before you'll be able to advance to the next mission after completing "Doberman." Another reason is monetary—you'll be able to collect cash at CJ's house in Ganton, and the reward gets bigger in proportion to the area of the city that you control. Finally, completely wiping one of the other gangs off the map means you won't have to worry about being jumped by its members while in Los Santos, because that gang will no longer exist. Keep in mind, though, that if you force one of the other gangs out of town during the first gang wars, it'll reappear by the time you return to Los Santos late in the game. There's nothing to be done about this; it's part of the storyline. However, after completing the story, the gang wars option will still be activated, and at this time it is possible to completely wipe out the other gangs, with no chance for them to come back. Although there's no real reward for doing so, it is extremely satisfying to grab 100% control of the city and get rid of those annoying rivals once and for all.

How Do I Start a Gang War?

Check the map to find a rival territory that you want to conquer. Your current holdings are shaded green, the Ballas land is purple and the Vagos territory is yellow. Enter an area held by another gang and find some of its members. You'll need to take out anywhere from two to four of them to start the war. You'll then need to survive against several waves of attacking enemy gang members before you can claim the territory for Grove Street.

gang wars 101

When you've got the gang wars option activated in the game, you'll want to keep some basic strategies in mind as you deal with the other gangs.

Be sure you don't initiate a gang war when you have a "Wanted" level. Even though the rest of the population

will clear out to let the two rival gangs do battle, the police and feds won't. You're much more likely to lose a battle if you have to worry about lawmen in addition to the attacking gangsters.

Once the battle begins, find some cover. Low walls, fences or hedges are excellent for this purpose. Crouch behind the cover and

let the enemy come to you. You're less likely to be hit when partially shielded behind obstacles.

Use your mini-map to anticipate the arrival of each wave of gangsters. They'll appear on the map. Sometimes you'll need to

deal with more than one group at a time. Do not get caught in a position where you'll be flanked by both groups. You'll want to move aggressively against one of the groups to eliminate it, and then deal with the second one without having to worry about any surprises.

Use these methods to take Los Santos back from the other gangs and keep the streets under the control of the Grove Street Families. You'll earn money and respect, plus you'll find that eliminating the rival gangs makes it easier to go about your business in Los Santos.

With the release of Halo 2. the most popular Xbox game has been given a massive upgrade, incorporating Xbox Live support for online multiplayer matches among other refinements. This monthly column will keep you informed with the latest goings-on in the Halo 2 community, including trends, strategies, tricks, exploits and new discoveries...and of course, we'll also show you how to become a more lethal online combatant.

HIDE AND SEEK THE SWEET SPOTS OF HALO 2 (Part I)

here's nothing quite like the feeling of stepping out behind an unsuspecting foe in Halo 2 and dropping him with a solid punch or a shotgun blast to the head. It's fun to watch your opponents scramble around, trying to figure out where the heck you are as your skull timer ticks off the seconds that bring you closer to a win. Halo 2 isn't just a game about itchy fingers and having the reflexes of a 12-year-old. Sometimes the odd angle or hidden spot leads to a surprised enemy, and a surprised enemy often winds up on the receiving end of dead. So here are a couple of sweet spots and fast routes around a few of my favorite maps in Halo 2. Study 'em and you'll be able to show your friends a thing or two at your next LAN party or Custom Game session!

Ascension

Got the skull and want to hide from those pesky people trying to kill you? Here are a few spots in Ascension where you can get away from the crowd and relax for a while.

Skull Spot I

On the bridge with the Overshield, just before you head into the sniper tower, take a look to your left. You should see a small ledge running around the outside of the circular ramp that's leading up. Jump onto the small ledge and

follow it around the outside of the ramp. Go just far enough so that you can't see the Banshee platform and you'll be out of sight

for a few precious moments while your opponents try to figure out where you are. If you are discovered and need to make a quick escape, jump straight up while facing the wall and you should be able to run up the circular ramp and into the sniper tower.

Back up a few more paces and you'll be out of sight from anyone looking to smoke you and take the skull.

Skull Spot 2

Look to your right over the edge as you once again stand on the bridge at the entrance to the sniper tower. At the base of the tower is an angled ledge; you can hop up there to add a few valuable seconds to your skull timer.

Be careful when you land, though; the angle of the ledge causes the Master Chief to slide a bit, so make sure you don't fall off! Unfortunately, there is NO escape from this hiding spot, so you'll have to either let your enemies kill you, or leap to your death to reset the Skull once you've been discovered. It's a suicide spot, but you will gain a bit of time if you can stay hidden. Get your teammates to distract and harass the enemy while you're hiding.

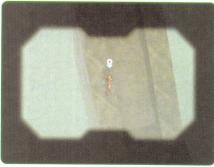

Skull Spot 3

OK, this one is a little weird. There is a large strut holding up the platform by the tuning fork. (You know, the sniper tower under the giant...uh, tuning fork?) You can see the strut if you hop onto the small lip on your right as you exit the teleporter. You can actually jump way, way down into

the mists and stand on that brace. It's a tricky one, though, because you have to land in the middle of the narrow ramp. If you nail the jump, don't move or the game will freak out and kill you for being so sneaky! This is another "suicide spot" which you can use to rack up free seconds with the Skull while your teammates

Here's a zoomed-in view to give you an idea of the distance of this jump. Look at the Mini-Chief!

Lockout

Lockout was the first map I booted up when I put Halo 2 into my Xbox for its virgin spin, and it's still one of my favorites. There are a few good ways to get around this level quickly, and one sweet "kill zone" that many players are still not aware of.

Skull Spot

This hiding spot will guarantee you a few seconds on the clock in Lockout. There are tiny ledges on either side of the ramp leading down from the central room into the gravlift chamber. A quick player can hop out onto either ledge and hunker down (make sure to duck!) for a few quick points on the clock. Be careful though, as you will still be fairly exposed to fire from one flank while on this

ledge. Be ready to hop back over and run when you are discovered!

Quick Route I

For those who enjoy a close-quarters CTF game on Lockout (like me), this little hop is a nice, quick jump to get the flag into your base for an easy

ag into your base for an easy capture. As you head through the center of the map, hop up onto the lip along this walkway and leap onto the sloped front of this bumper. Instant flag score! You don't necessarily need to crouch-jump to get enough height, but there is sometimes a brief pause when the Chief makes contact with the lip. This can get you killed, so pull those legs up to cut down on the friction.

Quick Route 2

This jump can be a little trickier. due to the fact that missing means you will plummet to a most ignominious death. Nailing it, on the other hand, means that you can get the drop on an unwary foe. As you head through the center of the map, toward the location of the Sniper Rifle, veer off slightly to the left. Make a quick little jump onto the small platform you see jutting out, then

crouch-jump out toward the corner of the ramp. The secret to making this jump is that you can't overshoot on that first little hop or you'll die. Nothing smarts worse than missing a kill because you hurled yourself over some ledge like a fool. So don't miss, or we'll all make fun of you!

Kill Zone

The central chamber below the main platform (right above the shotgun) is a hot route for people moving around the map. Since it's a high-traffic area, it's also a prime spot for you to up your kill count. Fortunately, you can tuck yourself nicely into the corners of this room and ambush anyone foolish enough to chase your bad self into this little trap. Rival players entering the room can't see you until

it's too late. Just make sure you have a solid dual-wield combo or a close-range weapon like the Sword to take down your target when they enter. After you grab a few ambush kills in here, move on. The enemy will catch on soon enough and start lobbing grenades to flush you out, or just kill you outright. Head out, get a few more kills elsewhere, then come back to set up another ambush later in the game.

Stick around, folks—there are plenty more places to hide (or ambush...or sneak...or jump...or hop to...or snipe from) in *Halo 2*, and we're doing our best to show as many as we can. Look for some more great spots in the next installment of *Halo 2 Insider*.

SGT. JOHNSON'S FOXHOLE

I love the piercing whine of a plasma bolt spitting out of the end of my rifle. And that splash it makes as it tears down your shields...music to my ears. So this month I'm going to be talkin' about the Plasma Rifle, one of the best all-around Covenant weapons in the game.

PLASMA RIFLE

Specs

Ammo Type: Plasma Clip Size: 100 (see note below) Firing Mode: Automatic

Cooldown Speed: 2.7 Seconds

Melee Speed: 0.8 Seconds Melee hits With Shields: 3 Melee Hits Without Shields: 1

Melee Hits With Overshields: 5

Scope: None Range: Medium Accuracy: High

Accuracy: High Duel-Wield: Yes

Shots Required Head Shots: 9 Charges Body Shots: 9 Charges Head Shots with Overshield: 8 Charges Body Shots with Overshield: 15 Charges

Note: The Plasma Rifle doesn't work off a traditional clip. Instead, it has a battery that holds 100 charges. Each charge will fire four plasma bolts before it is used up. So you have 100 charges, but 400 shots in each Rifle.

Strengths

This gun is great for dropping an opponent's energy shields down to zero faster than you can blink. With its high rate of fire and deadly accuracy, it can really fluster an opponent as well, throwing him off his game as he eats a constant stream of the white bolts the Rifle throws out. One of the best dual-wield weapons in *Halo 2*.

Weaknesses

If your target is outside of medium range, don't even bother to fire; you'll just spray wildly. The Plasma Rifle is highly accurate within its range, but outside of that zone, the plasma tends to spread out and miss the target. And watch out for that cooldown! Get caught with the weapon on overheat and it's curtains for you; it takes a long time to return to normal operating heat levels. Not so awesome by itself.

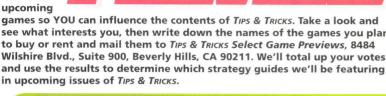

The Plasma Rifle is one of the nastiest dual-wield weapons in the game. Pair this beast up with any projectile weapon, like an SMG or a Magnum, and you'll be able to drop your opponents in no time. While not quite as powerful as an overcharged Plasma Pistol bolt, you don't have to deal with the make-it-or-breakit situation of the Pistol, because the Rifle spits out a constant stream. You also won't have to worry that your opponent will dodge your one shot as you show 'em who's the boss (by the way, it's Tony Danza). This weapon is also wicked in a dual-Plasma Rifle situation as well. The constant stream of hot, hissing plasma can block your opponent's vision while ripping through his armor. If you have a Plasma Rifle, however, make sure you find something to pair it up with quickly, as it's not so effective on its own. You need that double stream of death to kill effectively with this gun.

DEAD RISING

Publisher: Capcom In Stores: 2nd Quarter 2006

Dead Rising is Capcom's tip of the hat to one of the best zombie/survival horror movies of all time, Dawn of the Dead. Photojournalist Frank West is trapped inside a suburban super mall jam-packed with dead-eyed, flesh-eating reanimated corpses, and he has 72 hours to get the scoop and get out alive. The mall is enormous, featuring more than 100 stores (including a supermarket, a sporting goods store, antique shops and food kiosks) that span large indoor and outdoor environments, and everything in

those stores can be used as weapons.

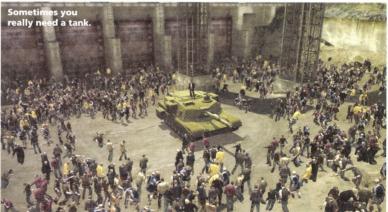

Cash registers, golf clubs, double-headed axes, patio umbrellas, lawnmowerseverything. The sheer mass of zombies is incredible, and it's easy for Frank to become completely surrounded, thanks to a powerful game engine that makes it possible for an enormous number of bodies to appear on the screen at one time. The pressure can feel overwhelming...and on top of that, time is constantly running out, forcing Frank to figure out what matters most to him. Is it getting the story? Saving the other survivors? Or just saving himself? Figure out where your own priorities lie when Dead Rising is released later this year.

LEGO STAR WARS II: THE ORIGINAL TRILOGY

Publisher: LucasArts

In Stores: October

Also On: PS2, Xbox

Based on *Star Wars* Episodes IV, V and VI, *LEGO Star Wars II* puts you in LEGO versions of the films' most

memorable battles and events, including the assault on the Death Star and entering the Mos Eisley cantina. The game "camera" has been improved from the first game, especially when playing in co-op mode, where the viewpoint expands to allow for greater separation between the two characters. Use of the Force and other abilities have been given an overhaul as well; the characters now have specific attacks that only they can perform, such as Chewbacca's "pulling people's arms out of their sockets" melee attack. Also new is the adaptive difficulty feature, which curbs the game's difficulty level automatically to match the player's skill.

OKAMI

Publisher: Capcom

In Stores: 3rd Quarter 2006

Okami is a beautiful reminder that the current generation of consoles is still capable of hosting visually impressive games. Its unique artistic style is courtesy of the innovative Clover

Studio, which also created *Steel Battalion* and *Viewtiful Joe*. The main character (a white wolf who is the physical embodiment of the Japanese goddess Amaterasu) uses a "Celestial Brush" to fight demons, solve puzzles and restore the landscape by literally drawing on the game canvas using the right analog stick. Her divine powers let her unlock special powers using simple symbols, and other weapons at her disposal include mirrors, beads and swords—all iconic objects in Japanese mythology.

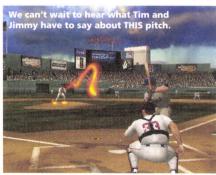

MLB SLUGFEST 2006

Publisher: Midway

In Stores: 2nd Quarter 2006

Just when you thought you'd only have one licensed MLB game this year, along comes *MLB Slugfest 2006*. Despite Take Two's "exclusive" licensing agreement, Midway still had the rights to release one more installment in its over-the-top baseball series right before the door slammed shut. In addition to the usual players catching on fire, fistfights on the base paths and general "extreme" attitude, *Slugfest* will also feature improved animations and a new create-a-player mode. Taking a

cue from EA's MVP 06 NCAA B as e ball, Slugfest 2006 will hit store shelves at a lower-than-usual price point of \$19.99, allowing casual baseball fans to get a fix for just a couple Hamiltons.

As seen in last month's Japan Report column, Sega's Ryu Ga Gotoku was re-

leased last year in Japan to critical acclaim; it was compared to both Shenmue (for its fighting elements and diversionary side missions) and Grand Theft Auto (for its urban realism, ultraviolence and free exploration). Sega is releasing a U.S. version of the game under the name Yakuza, which is the term for the Japanese Mafia, one of the most notorious organized crime syndicates in the world. In the game's story, which was written by award-winning novelist Seishu Hase, former Yakuza member and convicted murderer Kiryu Kazuma completes a 10-year prison sentence

and instantly gets mixed up with the Tokyo underworld again, thanks to a strange woman named Haruka and a lot of missing money.

Publisher: Activision

In Stores: 2nd Quarter 2006

Also On: PS2, GC, DS, GBA Over the Hedge is based on the DreamWorks feature film of the

same name. The playable characters include RJ the raccoon, Verne the turtle, Hammy the squirrel and Stella the skunk. RJ is convinced that animals can subsist off the treasure trove of food available inside the human suburban households that sprung up over the winter, so the animal gang goes on pantry raids for food, pitting their natural instincts against dangers like fences, closed windows and little boys. There are plenty of diversions as well, including mini-games like "Suburban Mini Golf" and "RC Car Racing" as well as a co-op multiplayer mode where friends work together to steal food.

GALLOP RACER 2006

Publisher: Tecmo

In Stores: May

The sport of kings is returning to the current king of consoles. Gallop Racer 2006 is shaping up to be the most realistic, in-depth horse racing sim this side of Louisville. Four

modes are included, but the meat of the game is found in the

Theme Park mode, where you can create your own horse. After you research your chosen stud and broodmare's respective lineage, you'll create what is (hopefully) the next great champion. From there, your horse's career is up to you, as you decide which races are appropriate for it to enter. All that's left is to mount up and win! If you've always wanted to breed, train and race your own thoroughbred, but couldn't come up with the \$5 million, now's your chance!

sional environments. You're no longer limited to punching just the sides of buildings; you can now scale the face of a building and punch out *all* of the windows as you search for power-ups and tasty human snacks. Several dozen new playable characters can be unlocked, and you now have much more time to explore each city, which is the one thing that really limited previous games in the series (two of which are included on the game disc). Look for a *TIPS & TRICKS* strategy guide next month!

RUMBLE ROSES XX

Publisher: Konami In Stores: 2nd Quarter 2006

Rumble Roses XX targets a very specific audience, and makes no bones about it. The next-generation installment of the all-female

wrestling game has many new gameplay modes, such as Tag Match, Queen's Match, Handicap Match and the Pure Humiliation Match; the last one can only be ended when one of the wrestlers performs an H-Move on her opponent. Wrestlers' clothing and even physiques can be customized, and you can photograph characters in front of different settings and share the images online. Players can also enjoy four-way online action over Xbox Live, where player rankings will be available.

BLAZING ANGELS: SQUADRONS OF WWII

Publisher: Ubisoft

In Stores: 4th Quarter 2006

Blazing Angels is a squadron-based dogfight simulator that drops you into the cockpits of 38 different aircraft in the most memorable battles of World War II. As a squad leader, you'll have to draw on your

wingmen's specific skills and use them to your advantage dur-

ing battle. The graphics are impressive; dynamic lighting, particle effects and shading bring battles to life with realistic sun glare effects, light streaming through clouds and even realistic battle damage. You can actually see individual bullet holes on both aircraft and buildings. Xbox Live support is included, with up to 16 players able to take each other on in freefor-all dogfight matches or work together in 10 additional cooperative missions.

STEAMBOT CHRONICLES

Publisher: Atlus

In Stores: May

Steambot Chronicles tells an unusual story about the evolution of cars into "Trotmobiles," the subsequent industrial revolution and the forward march of technology. The main character,

Vanilla Beans, wakes up on a beach with no idea how he got there, as a succession of weird events and unusual opportunities begin to unfold. Should he join a band called the Garland Globetrotters, or hook up with the Killer Elephant gang instead? Before long, he's building Trotmobiles and friendships while kicking ass all over town, fighting enemies and boss

mechs. The game gives players the chance to make their own choices, with an open environment and non-linear gameplay.

LOST PLANET

Publisher: Capcom

In Stores: 1st Quarter 2007

Capcom's Keiii Inafune is a big a fan of director John Carpenter, which is why his new game Lost Planet may remind some gamers of Carpenter's

remake of the horror movie The Thing. In the game, human snow pirates use large robotic vehicles called Vital Suits to bat-

tle the Akrid, huge insects similar to the creatures in Starship Troopers. Wayne, a pilot whose only clear memory is of his father being killed by the Akrid, must try to regain his memories and find out who is trying to exterminate both the Akrid and snow pirates. Multiplayer mode will host team battles over Xbox Live (both cooperative and competitive), along with downloadable content.

SUIKODEN V

<u>Publisher:</u> Konami

In Stores: 2nd Quarter 2006

Suikoden V stars a young prince whose mother, Arshtat, is the ruler of the Queendom of Falena. Unfortunately, something's gone wrong in her head, and she's using the Sun Rune, a powerful talis-

man, to violently suppress civil unrest in parts of the land. The 108 Stars of Destiny tradition continues, and there are more than 60 playable characters to uncover throughout the game. The story in Suikoden V is the longest one in the series, featuring branching paths, multiple endings, surprising plot twists and voice acting throughout the many cutscenes.

TEKKEN: DARK RESURRECTION

Publisher: Namco

n Stores: 3rd Quarter 2006

Tekken: Dark Resurrection takes the King of the Iron Fist Tournament on the road, as the series makes its PSP debut. Newcomers Lili and Dragunov mix it up with Heihachi, Jin, Law, Paul and others in 19 gorgeous and fully destructible stages. There are more than 30 characters in the game, and you can use money earned through fighting to customize their appearance. Tekken: Dark Resurrection also takes advantage of the PSP's Wi-Fi connectivity so players can join Ad Hoc fights and even participate in mini-game battles against friends.

PIRATES OF THE CARIBBEAN: DEAD MAN'S CHEST

Publisher: Buena Vista

In Stores: 2006

Also On: DS, GBA

If you just can't wait until the July 7th premiere of the movie to see what Jack Sparrow is up to. why not be the campy cap'n with Pirates of the Caribbean: Dead Man's Chest? The third-person action/adventure game, which is based on the film, puts you in the role of the swashbuckling

Sparrow. As the mascara-wearing, oneliner-spouting pirate, you'll use everything in your arsenal—including kicks to the family jewels—in order to recover the ultimate pirate's booty: the Dead Man's Chest. With a variety of weapons and multiplayer capabilities, Jack Sparrow's high jinks will live on well after the final credits of the film have rolled.

BUST-A-MOVE DELUXE

Publisher: Majesco

Available Now

One of the new modes is Seesaw Puzzle where the board tilts according to bubble weight.

Bust-A-Move (a.k.a. Puzzle Bobble) was an instant arcade sensation when it was introduced back in

1993, thanks to its simple controls and addictive bubble-popping action. Bub and Bob the dinosaurs are back, with a bunch of new game modes for the PSP. In addition to Classic Puzzle, there are seven other modes, including Blind Puzzle (where the bubbles don't reveal their colors until they're struck) and Running Launcher Puzzle (where the launcher is constantly moving back

and forth). On top of this, there are six new characters to keep Bub and Bob company, from a drunken wizard to a pugilistic spring. It's also (literally) a pick-up game, where two friends can compete wirelessly.

TETRIS DS

Publisher: Nintendo

Available Now

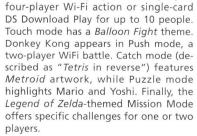

The original Game Boy version of Tetris was one of the most popular games of its time, yet very few players are aware of the fact that Mario and Luigi appeared in the

game's two-player link mode. Well, you won't miss the Nintendo characters in Tetris DS, since each g a m e mode

Mission mode features artwork from the Leaend of Zelda series.

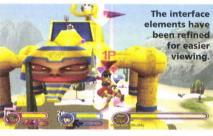

POWER STONE COLLECTION

Publisher: Capcom

In Stores: 4th Quarter 2006

This PSP compilation includes both Power Stone and Power Stone 2 with upgraded features and gameplay elements. The four additional characters from

Power Stone 2 have also been added to the original Power Stone, allowing you to choose from 15 characters in both games. A new mini-game, Bomber Battle, challenges players to

defeat each other in levels filled with giant bombs. Ad hoc multiplayer is supported, with the option to have up to three players using only one UMD. A "Screenshot" mode allows you to take wacky screen captures and save them on your memory stick to share with friends. The camera has been reworked and the screen has been reformatted to better suit the PSP's screen dimensions.

DRIV3R/THE GETAWAY > SAN ANDREAS

First, I just wanted to tell you that you do a great job on the magazine, every issue. I just wondered if you know how overrated Grand Theft Auto: San Andreas is. Sure, it's OK, but way too overrated. I played it, beat it and started again, but got tired of it. The storyline gets sickening and the character is a bigheaded idiot who thinks too much of himself. This is the only game people talk about at school...boring. Games like Sly Cooper and The Nightmare Before Christmas, they don't get the publicity they deserve. Vice City or the old GTAs are about the best; San Andreas is too complex. I'd rather play Driv3r or The Getaway rather than San Andreas. Rockstar does a great job on all their games, but when a new GTA game comes out, fans will expect it to be much greater than it will be.

-Trey Christy Canton, MO

We don't necessarily agree with everything you said, but you've touched on one very good point: It really is a shame that more people don't get exposed to games like Sly Cooper because they're so obsessed with million-selling blockbusters like San Andreas. But that's just an unfortunate fact of life in the entertainment business; for every Welcome Back, Kotter, there's always a Joe & Sons that gets trampled under foot.

HEY

Hey, I'm 11 years old. I've been getting your magazine since 1999. Then I stopped...then my next issue was May 2004. I've been getting them ever since. I have a couple of things to ask you.

- 1) Why did you start doing a videogame magazine?
- 2) Do you guys have at least one copy of every single issue? If you do, please take a picture of the stack.
- 3) Are you guys still going to make TIPS & TRICKS for a while or are you going to stop soon?
- 4) How many people are there in your company?
- 5) One last thing: In Super Smash Bros. Melee, can you unlock Master Hand? How? And can you unlock any other characters besides Jigglypuff, Dr. Mario, Luigi, Young Link, Pichu, Falco, Ganondorf, Roy, Marth, Mr. Game & Watch and Mewtwo?

Thanks for your time.

-Richard Conklin Eatonville, WA

Hey, our magazine is older than you are!

1) Because we knew that people are interested in tips, cheat codes and passwords, and we've always been really good at finding and documenting them. We figured that people would be willing to pay to have this information presented in a reliable, clear and organized fashion. And it beats selling shoes.

2) Sure we do. The stack is getting pretty tall, too!

- 3) Like we always say, we'll keep making it as long as you keep buying it.
- 4) About 220, but only eight of us work exclusively on TIPS & TRICKS.
- 5) No, there are no other characters to unlock. There is a set of codes for the Action Replay cheat device that supposedly allows you to play as Master Hand, but it's very "glitchy" and we were never able to get it to work properly.

I would like to tell Austin that he needs to get his nose out of the magazines and out from in front of the games...to get out in the real world and learn a little respect for people, and maybe even try to mature a little. Sorry my letter is not filled with mindless insults, but nevertheless, I hope Austin will have a chance to read this. Thank you to the person who takes the time to read

—Jenny Shipps and Skyler Reed Tecumseh, KS

CORRECTION

In the Select Game Previews section of issue #133, we mistakenly identified Sega as the publisher of the Xbox game The King of Fighters: NeoWave. The publisher of the game is in fact SNK Playmore. We apologize for any confusion this may have caused; apparently we got our arcade legends mixed up.

WE KNEW THE LETTERS WOULD COME

I am writing in response to the letter you published by Austin Rollins of Bristow, Virginia ("Dog, Skunk and Elephant," March 2006). My 11-year-old son, Skyler, is a subscriber to TIPS & TRICKS. I am upset that someone would call an 11-year-old an idiot for liking a magazine. I am also really upset that someone would call my son a brain-dead monkey.

Austin, I have to say that my 11-yearold is more mature and has more respect for people than you do. If you do not like a product, the thing most people do is no longer use the product. Or you could ask the people that make the product to include more of what you need from the product. My son has enough sense to know this, unlike you. My son would like me to mention that he is very happy with the magazine so far, and that it has helped him a lot with the games he owns.

Sony is upping the maximum storage capacity of its teensy Memory Stick Pro Duo with the scheduled release of a 4GB card this July. Pricing is expected to be approximately \$250. Sony is also prepping an 8GB card for later this year. The Pro Duo cards actually have a mind-boggling "theoretical maximum capac-

ity of 32GB," according to a Sony document. Sony also announced the planned debut for this summer of its Memory

Stick File Rescue Service, "which helps recover certain files lost through accidental deletions or data loss." It's free recovery software that's available from http://esupport.sony.com after registering the memory card's model and product lot number. Sony claims the software will facilitate recovery of JPG, MPEG1 and MP4 files, and is compatible with all Memory Sticks sold since 1998.

and Comic Book Games

Howdy, and welcome to the inaugural edition of what we hope will soon be your new favorite thing in the world: TIPS & TRICKS' new monthly comic-book column. Comic books and video games are doing the Reese's Peanut Butter Cup dance all over the place nowadays, and it's no wonder-a fine illustrated periodical is the perfect medium for expanding the world of your favorite game. We want to be your eyes and ears in the four-color world, so if you have any questions, theories or bones to Vol. pick, give us a shout. Otherwise, in the words of the great Stan Lee, "Excelsior!"

(Man, we've always wanted to write that!)

Are you a Tron fan who didn't get enough of a geek fix from the movie's recent video game sequel, Tron 2.0? Well, the Disney franchise is getting the sequel treatment again, but Jeff Bridges and Bruce Boxleitner haven't signed any contracts. (Curses!) This time. Tron's new incarnation is as a funnybook. Written by Landry Walker and Eric Jones of Little Gloomy fame and illustrated by animator Louis De Martinis, Tron: The Ghost in the Machine follows the further adventures of 2.0 hero Jet Walker, who's been suffering some serious shellshock since his exit from the computer world. Due out in April from Slave Labor Graphics (which is also publishing a comic book based on Disney's Haunted Mansion ride), The Ghost in the Machine promises to give fans as much light cycle-racing action as they can handle, as well as probe the downside of being turned into a digital hero against your will—a plot point which we speculate might have something to do with huge Xbox Live bills.

A little birdie tells your humble TIPS & TRICKS correspondent that adaptations of Ubisoft's Prince of Persia, Ghost Recon and Splinter Cell titles might soon be creeping their way to comicbook stores, courtesy of a super-hot, upstart independent publisher. We

can't tell you the publisher's name, but we can give you a hint to it's identity: The publisher recently racked up critical accolades for a lushly illustrated retroadventure comic. The ink isn't dry on the

deal yet, hence the secrecy, but we've been told that "it's looking good." Our source is also keeping mum on the prospective creative teams, but did say that if the deal goes through, the resulting comics will be "bad ass." Keep your eyes on this space for updates!

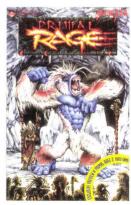

BACK-ISSUE BIN

PRIMAL RAGE

A four-issue mini-series published by Sirius Entertainment, Primal Rage tried to tell the story of the giant apes and dinosaurs seen in Atari's arcade game of the same name. Written by Chris Knowles and illustrated by Kevin

Rasel, the first issue also includes drawings of five characters from the game's sequel, Primal

Rage II, which was never released. The comics are undated, but judging by the copyright notices on some of the ads. issue #1 was released in 1996. The remaining three issues were done on the cheap over the next two years, with black-and-white interiors and in-

ferior artwork by Tom Artis. The painted covers by Dark One are pretty sweet, but unless you're a huge fan of the game and you have a few bucks burning a hole in your pocket, there's not much else here to recommend.

KONAMI DIGITAL COMICS FOR PSP

You play games and watch movies on your PSP, but have you ever read comics on it? Konami has announced two new UMDs that will allow you to do just that, and much more.

The Silent Hill Experience UMD is loaded with music from the Silent Hill game series and video content such as creator interviews, but the centerpiece is a new Silent Hill comic created specifically for the PSP by writer Scott Ciencin and artists Steve Perkins and Alex Shibao. Also included is a digital version of IDW's Silent Hill: Dying Inside comic miniseries, specially formatted for the PSP's screen dimensions and interactive abilities.

There's also a Metal Gear Solid UMD on the way which features IDW's Metal Gear Solid comics in digital form. Kojima Productions is converting the story into an interactive experience with music, sound effects and animation. The Silent Hill Experience UMD was scheduled to be released in conjunction with the Silent Hill movie on April 21, but the Metal Gear Solid digital comic still had no official title or release date at press time.

Here's a handy list of video game-related comics and manga that are currently shipping to comic shops and book stores. To locate a comic shop near you, visit csls.diamondcomics.com on the Web or call 1-888-COMICBOOK.

ACO ACCORDED

There's good news for fans of Capcom's Phoenix Wright: Ace Attorney Nintendo DS game: Capcom is bringing over more of Phoenix's case files from Japan, where the rookie defense lawyer originated in a series of Game Boy Advance games called Gyakuten Saiban ("Reversal Judgement"). The bad news for DS owners is that they won't be appearing on the Nintendo DS anytime soon. Instead, Capcom has announced that Phoenix Wright will be making his case on cell phone handsets this fall. The mobile version will feature four episodes that will have the rookie defense lawyer battling through 18 cases, working witnesses to separate the truth from the lies and getting down to the bottom of who's guilty. Once you're through the initial batch of cases, you can look forward to the ability to download a new case each month, and an online leaderboard will counsel you on who's raised the bar the highest.

Capcom is also working on a mobile adaptation of its ambitious science-fiction action title, Lost Planet (which is currently being developed for Xbox 360). Though little information is available about the mobile game, it promises to match its big brother's story of humans versus

crea-

tures

on a

massive

frozen planet, though with the humans having access to giant mechs to help even the odds. The mobile game appears to be running with a three-quarters overhead perspective. As for the release date, Capcom is saying that the Xbox 360 and mobile games will be simultaneously released, and the current plans have them coming out at

bly challenging. You start with a somewhat simple fish tank, and you have to keep your fish fed or

else they'll die. (Duh!) However, you also need to collect the coins they drop, which enables you to buy more fish, food and items at the store...including the three

your laser, and the balancing act begins to get a bit more daunting.

If you can keep your fish alive for a long time, they'll drop stars instead of coins, and later, more valuable diamonds. As you progress through the game's 15 levels, you'll have access to more "pets" and helpful items through the store—all of which means there's an increasing amount to keep track of and the screen gets very busy. The controls are fairly simple, with the D-pad moving your cursor around the tank, and each number button enabling you to quickly buy an item from the store. It's the gameplay that gets frantic, and

it's not long before you realize why the game is called Insaniquarium. Two modes—the standard Adventure and the quicker-play Time Trialwill give you hours of frustratingly fun gameplay.

Glu has also announced that it has acquired the license to bring out "World Series of Pokerbranded content, including games, graphics, ringtones and other applications." The company isn't offering information on the first game title other than that its release date will be in August, which looks like it's timed to appear right after the conclusion of this year's \$10,000 buy-in Main Event championship concludes.

Insane + Aquarium = INSANIQ

Glu Mobile keeps tapping the wealth of casual games on the Web (such as Diner Dash and Zuma) and turning them into addicting mobile games. The latest addition to its catalog is Insaniquarium, which has been scheduled for an April release. If you've ever played the Internet version before, you know how simple it is to play, yet it can also be incredi-

pieces of the egg you need to jump to the next level. Before long, you'll

also get fish-eating fish and alien invaders that you need to clear with

You Gotta Have *Balz*

Without any explanation, Konami has announced a name change for one of its games. Tamakoro 3D, which was featured in last name Balz 3D (not to be confused with the Sega Genesis/Super NES fighting game Ballz 3D). Ac tually, the original Japanese name meant "ball

the end of 2006.

The Call Goes Out Once Again

Mforma has had so much success with its mobile version of Call of Duty that a sequel was inevitable. Call of Duty 2 features squadbased World War II combat that lets the player take the role of American, British or Russian soldiers in "historically accurate scenes and situations" across such locales as Normandy, North Africa and Stalingrad. The game offers 12 levels of intense action set in

the latter years of WWII, and requires you to move your men through countless enemies, gunfire and explosions. Each level features multiple objectives you'll need to complete before you're done, and you can have your men crawl and hide behind cover to make them less prone to being killed. On the offensive side, you can also equip them with any of the 18 authentic weapons re-created in the game. Call of Duty 2 is already available.

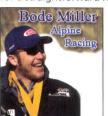

A Second Shot at Pole Position

Namco has a lot of game history it can tap for mobile releases. The latest to make the conversion is Pole Position II, a simple-but-HITHIGHTON challenging racing title faithfully adapted from the 1983 coin-op. Interestingly, PPII is a pseudo-3D game, so it doesn't really push even handset hardware too hard, but having simpler graphics hardly makes it a weak contest from a gameplay standpoint. It zips along at a tough pace and the tracks test your ability to steer the car through computer-controlled traffic. Veteran arcade players will get a renewed retro kick from the old classic, while newbies will be sucked in by what video-game fun was all about 20 years ago. Pole Position II is available now on many carriers

Winter Olympics Continue

Though the real-life Winter Olympics are long completed, Abandon Mobile is pushing some handheld activities that connect to both the recent events—and, with one of them, the TV network that covered them. Both games are already available.

Bode Miller Alpine Racing takes advantage of the U.S. skier's fast-paced success (though not at the Torino games) and worldwide recognition as the backing for a straightforward racing sim that has

you negotiating a downhill, Super G or slalom course filled with tight turns and myriad obstacles. The controls are really simplebasically turn left, run right

and tuck for speed—but it's the striving for a first place that'll have you returning to play over and over. Can you make it to the podium with a shiny medal

NBC Sports Figure Skating is an interesting contest. Instead of having you master twirling and jumping your skater by doing intricate button combinations (which are always so much more difficult on a hand-

set than a console's control pad), Abandon opted to change the control scheme into something like Dance Dance Revolution. The goal is to hit the proper number key when it's centered

in a ring. Time it right and you'll hit a trick. If you're slightly off, you'll falter. Miss altogether and your skater will take a tumble. Just like Bode, there's not much challenge in getting to the end intact, but

it's getting the whole sequence that'll have you standing atop the podium listening to your national anthem.

with Gorillaz-RealNetworks and the comic-

rock band Gorillaz have partnered up for an exclusive mobile game called Gorillaz Entertainment System. Real, through its Mr. Goodliving development studio and in conjunction

the West London animation/graphics design house called Zombie Flesh Eaters, created four "easy-to-grasp minigames" that correspond to each

band's cartoon members. The game was scheduled to be released to the public in April, and you can check www.mrgoodliving.com/Gorillaz for more information.

• Mobizzo Offers Mo'-Fox Mobile Entertainment announced the debut of Mobizzo, which it calls "a comprehensive destination for mobile content." The site will host a large catalog of graphics, ringtones, music and, of course, games, which Mobizzo will gather from various

developers and publishers. Many of the games will be based on Fox brands like 24, Family Guy and Napoleon Dynamite. The site

will also feature original titles like a fast-paced car-chase game called Coppers, an overhead air-combat title called Total Air Mayhem 1942 and a 3-D golfing game entitled Golf Pro Contest. Buying content is easy, with two methods available: through the Mobizzo Web site or directly through your mobile handset.

THE KING OF ONLINE RACERS? Burnout Revenge Goes Live on Xbox 360

You can keep your Gran Turismo, your TOCA, your Project Gotham; I'll take the adrenaline-fueled mayhem of Burnout over a sim-style racer any day of the week. By adding pedestrian traffic to racecourses and rewarding reckless driving with turbo boosts, the Burnout games deliver a heightened sense of excitement that leaves

standard racers spinning out in the dust. Add a wide variety of high-speed vehicles and great course design, and the result is a racing series that appeals to all gamers.

The previous installment, Burnout 3: Takedown, offered excellent online gameplay for both the PS2 and Xbox. However, the latest edition, Burnout Revenge, really shines on the Xbox 360 and trumps all other racers with its superior online game play.

Since none of the vehicles and courses that are unlocked in single-player mode are transferred over to multiplayer, I decided to forgo the single-player experience until later. I never liked being forced to unlock items in single-player mode in order to use them in multiplayer, because I don't always have time to play through a game before I go online. There are also some titles that feature great online play but offer poor single-player modes, which makes unlocking items a tedious chore.

The Top Burnout

When the online menu appears, the usual quick match, custom match and create match options are available, as well as the Scoreboards roundup. This feature lets you see how you rank against other Burnouts in the world, for both online and offline ac-

complishments. Online rankings are determined by how well players do in races and crash mode, and there are even separate categories like "World Ranking," "Fastest Laps" and "Biggest

Crashes." Offline rankings show the fastest laps, biggest crashes and best traffic attack scores from World Tour mode. Needless to say, this game is the only place where people actually want to be known as the "top Burnout"!

Experienced Xbox Live gamers know that quick match thrusts them into a random match where they are pitted against drivers of similar skill, and custom match lets them determine the parameters of the race. Custom match players can choose ranked matches or

unranked player matches, select race or crash mode and set the vehicles' top speed. Depending on their performance, ranked matches add or subtract notches to a player's world ranking, while player matches exist just for fun. Top speed selection starts at "unrestricted" and descends from 209 mph to 206 mph and so on.

Friends and Rivals

I chose to begin with a regular race and joined five other people in the pre-race lobby. We didn't have to wait long to start, because vehicles are selected after the host initiates the event instead of before. (This also seems to help everyone load the level at similar speeds; I never played a game of Burnout Revenge online where someone started the race late due to slow load times.) Another user-friendly addition is the ability for the host to adjust how many rounds the match will last. After each round, the next one begins without forcing you to return to the game lobby (although the load times for this can be long).

Scores from each round are added up, and the player with the fastest time or highest score is the winner, depending on the event. After the match is over, all players are returned to the lobby where they can either leave or join another match. This lets players become familiar with others and start online friendships rather than facing new players every race. It is amazing that such a simple addition can really heighten gameplay; I can't tell you how many times I've played an online game that shoots the player back to the server selection screen after one round.

Since trading paint with fellow racers while playing *Burnout* is as common as catching air, it comes as no surprise that I crashed into (and was crashed into by) many other racers. One of the coolest features of this title is the fact that the game keeps track of each of these takedowns and labels the players who cause them as your "rivals." A rival is identified on your screen by a red inverted triangle over his or her car, while your own car

is marked with a green triangle to let the rival know that you're seeking revenge. Not only does the game remember who took me down and whom I have taken down, but it also displays how many times the enemy made me crash and vice versa. If a player takes down a rival, the roles reverse and the player becomes the new rival. All rivals are tracked by Xbox Live for a maximum of six months, so players can create hundreds of rivals across the world. Generating rivals adds a new element to racing, as it fuels the desire to inflict more carnage...and also generates plenty of smack talk.

Red vs. Blue

The second racing mode is called Road Rage, and pits two teams of vehicles against each other in a competition that makes the movie *Death Race 2000* seem like a peaceful Sunday drive. While the blue team's only goal is to make it over the finish line with-

out being taken out, the red team is tasked with eliminating the blue team before they finish. Only one takedown is needed to eliminate someone from the blue team, but eliminated members can still help their teammates by blocking and crashing into members of the red team. Red team members get unlimited boost to help them keep up with the blue team, while the blue team gets...well...nothing extra.

Rivalries exist in Road Rage just like regular races, and can reach high numbers of takedowns, since it is the object of the mode. This causes players to be wary of teammates if they are rivals, because you never know when a teammate will turn on you. Since the gameplay

is so frantic, it is also easy to accidentally take down a teammate when trying to crash into an opponent. So easy, in fact, that by the end of one match, I had five new rivals, two of which were on my own team. *D'oh!* But this small setback didn't discourage me from continuing to play Road Rage. After all, where else can you engage in team vs. team automobile races?

Crashing Drive

While the racing modes are extremely fun, I spent most of my time online playing the crash modes, where players launch their vehicles into intersections and try to create the biggest pileup possible. Perhaps it's because I like the party atmosphere, or maybe it's because I love causing wanton cyber-destruction! Fortunately there are no drivers smashing through windshields or I might actually feel guilty about creating a 52-car pileup.

Crash Party seems to be the most popular of the crash modes, and lets each player initiate their pileups simultaneously. After each round, the player can see their score as well as the scores of their opponents. There is even a "ticker tape" streaming across the screen that

displays everyone's high score for that particular level. At the end of the match, the player who consistently placed highest in each round is the winner.

During the pileup, players can see how their scores compare with others in real time on the side of the screen. While this doesn't really affect game play, it is a convenient addition that is appreciated. What isn't appreciated, however, is the fact that there is no

"fly-by" of each crash level before the player undertakes it. Since there are dozens of crash levels, it's impossible to remember the layout of every single one. As a result, it's not uncommon to miss the main area of the crash level because you just don't know where the heaviest traffic is located. It's also easy to choose a car that's too fast, too slow, too light or too heavy to be effective if you're not familiar with the level.

Two other crash modes exist, but I didn't see anyone playing them online. I even created matches using these modes, but no one joined. The first is Crash Tour and features levels with a minimum score to reach in the fewest tries possible. If the score is not reached, the player has to repeat the level. Whoever reaches the target score in the fewest tries wins that round. The last crash mode is called Crash Battle and forces two players to go head-to-head on the same level and achieve the high score. It is even possible to take out your opponent to heighten your score...and severely limit theirs. But be warned that players who do so will definitely get an earful of aggressive expletives. Fortunately, most of the online players that I encountered act mature, so the hate is fleeting.

Revenge is **S**weet!

Despite the gorgeous high-definition graphics and impressive particle effects, I did not run into one instance of lag or frame rate slowdown while playing *Burnout Revenge* online. Even with six cars battling it out for first place amongst a wide variety of pedestrian traffic, massive crashes at every turn and highly detailed backgrounds throughout every level, the game play was not affected. It's the epitome of what virtual racing should be, exciting to the very end.

Greetings, sports fans, and welcome to the Tips & Tricks sports section. In this monthly column, we'll be bringing you all of the freshest dirt on your favorite sports video games. We'll also show you the newest sports-related game goodies and comment on the latest happenings from right here behind the ...

MLB 06: The Show once again proves that Sony's baseball sims are among the best sports series available for the PSP. Last year's game, MLB, was a solid launch title for the PSP, but it still took many shortcuts when compared to the console version. Not so this year. MLB 06: The Show for the PSP has almost all of the same improvements and updated polish as the PS2 version, an astonishing feat for any console-to-portable translation. One of the most shining features in the game is the incredibly realistic play-by-play delivered by Rex Hudler, Matt Vasgersian and Dave Campbell.

The commentary is far from just judging whether a play was good or bad. They will laud you for a good play, but still give you encouragement to improve on other aspects, or show disappointment for a botched play but recognize the effort. And it

may be just because the PSP speakers are so tiny, but the game also gives the announcers a nice "in the box" effect that helps to create a real summer-days-by-the-radio feel.

Player animations are vastly improved. Finally we get to see the batter walk up to the mound, a feature not seen in last year's version. Batting animations have all the extra nuances, like over-extending while chasing a bad pitch, and (of course) more elaborate home run celebrations!

If there is one thing that falls short in this otherwise solid PSP baseball game, it's that the pitching meter is much too small for the PSP's screen. It's understandable, since the exact same interface was moved from the PS2 version onto the PSP,

but the pitching meter needed to be resized. The "sweet spot" for releasing the pitch in the circular icon ends up being a tiny sliver about one pixel wide, making it next to impossible to judge the timing of your wind-up. That being said, the game is not too punishing when it comes to inaccurate pitches, and you still feel in control of the mound. You can also choose the "classic" pitching interface from previous 989 MLB games, which helps.

Sony's baseball games have always had a pretty straightforward fielding system, but sometimes it came across as too stiff, without any real drama. This year's game tries to change that; fielders will make occasional errors, like overthrowing first-base or

bobbling grounders. By the same token, the fielding mechanics have become more complex, with the ability to "preload" your throws before even catching the ball, so all the motions are executed in one smooth move.

The Show has all the extra gameplay types expected in today's base-

ball games, like Exhibition and Season modes. A new Career mode lets you take a no-name player and take a chance at making it to the big leagues. One omission which could potentially be upsetting is the lack of ros-

ter-tweaking functions in the main menu; in fact, it's almost unheard of in a sports title today. Fortunately, any roster updates for the PSP version of MLB 06: The Show will occur online and can be carried over into the single-player mode after logging out. Now whether Sony will be vigilant about keeping the rosters up to date is a whole different matter! Maybe one day it can implement a system where the roster in your PS2 save file can be brought over into the PSP.

MLB 06: The Show is a huge improvement over last year's debut title for the PSP. The polished presentation, outstanding motion-capture animation and improved gameplay make this game a joy to play, especially with headphones. So the next time you take your PSP to the game, don't be surprised to see folks in the stands crowding around you instead of watching the real thing on the field!

Among the most notable are the animation and authentic look of the players; the unique ball-handling skills, signature moves and playing styles of specific players have been recreated within the game, yielding many distinctive personalities. Another new fea-

NBA Ballers: Rebound for the PSP is basically a shrunken-down version of NBA Ballers, the street ball hit that came out for multiple consoles exactly two years ago. And it was exactly two years ago that cover athlete Stephon Marbury moved from Phoenix to New York, forcing Midway to scramble and redo all the artwork for the game just before the release! It'll be another two years before we see another NBA Ballers game for the PSP, thanks to the new bi-annual agreement for arcade-style NBA games given to EA and Mid-

way. Since NBA Ballers will have to wait on the sidelines for NBA Street to go by next year, it would make sense for Midway to make sure the game has long-lasting appeal.

Overall the PSP version of

the game is pretty much a note-for-note translation of the console game, with a few bonuses and updates to make it worthwhile. Unfortunately, the game doesn't use the online Infrastructure Mode, which was a key component in the console versions. However, there are plenty of mini-games in the Wireless mode to play with people close by. Of course, a few NBA stars have been swapped out from the old version to reflect today's newer sensations, plus there are several new courts and clothing items that are exclusive to the PSP version. Some other more subtle changes involve the control

scheme, since the PSP lacks a right analog stick. Compared to the NBA Street series, however, the use of the right analog stick isn't as crucial in NBA Ballers, so the difference is not that pronounced.

Like the console versions,

the single-player meat of the game is in the Rags to Riches mode, where you build up your custom-made street baller and his phat crib by earning your keep on the courts. The story plays out in a sort of NBA on TNT-meets-MTV Cribs-type reality TV show, where greedy corporate executives are hoping to land the next big thing. As your player takes down opponent after opponent, his lifestyle

improves along with his play. He gets more jewelry, mansions, automobiles, and expensive threads, not to mention a whole posse of girlfriends and homies to roll with! Most of the matches are

short one-on-one games, making it ideal for the in-and-out style of handheld play. With the ability to pull off combos and special moves, the game almost feels like a fighting game rather than a pick-up basketball game; this is after all, the same publisher that brought us the original NBA JAM! Since the rounds are short, both offense and defense become equally critical in each match, result-

ing in many testy, back-andforth contests. Building up your wimpy player into a basketball phenom becomes a fun distraction rather than a colossal effort.

Obviously the game doesn't look nearly as good as the photo-realistic graphics of

the console version, where you could see every pore in a player's face. The PSP version, however, does a pretty good job of mimicking the same dramatic camera angles—like after an explosive dunk—and the humorous pouting looks of NBA players after being posterized. From Dr. J's nonchalant dunk expression to Rip Hamilton's Hannibal mask, Rebound is more than adequate at get-

ting the look of each player down pat.

Like all the over-the-top Midway sports games, NBA Ballers: Rebound is all about unlocking tons of extras and bonuses in singleplayer action while irritating your opponents in the

multiplayer mode. The only real drawback is that it's almost exactly the same game as the one released two years ago. However, NBA Ballers: Rebound still feels fresh after all this time, which is a testament to the first game's popularity. Pick it up if you haven't played the original!

DS LITE: SOLD OU

The Nintendo DS Lite launched in Japan during early March with three different colors: Crystal White, Ice Blue and Enamel Navy. Ice Blue and Enamel Navy were released a week after Crystal White, but by all accounts, everything has sold out in a matter of hours. In fact, Nintendo has been issuing apologies to its Japanese

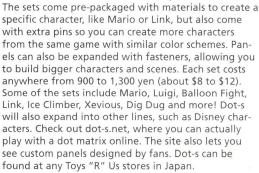

on both the Nintendo DS Lite and the regular DS. Many stores in Japan have been importing North American DS units just to keep up with demand (there is no region encoding on DS games, plus the menus

on one. There has been no U.S. date set for the DS Lite, most likely because of the supply problems in Japan.

A new fad is sweeping across retro gamers in Japan: Dot-s! Made by Tomytec, Dot-s comes with a plastic panel with holes and a set of square dot pegs so you can create your favorite 8-bit character, one "pixel" at a time!

At the recent Spring Nintendo DS Conference, Nintendo revealed some intriguing new functions for the Nintendo DS. In conjunction with Opera Software, Nintendo is developing a Nintendo DS Browser that will let you surf the Internet. The touch screen will be used

to navigate the Web and even write words and numbers by hand with the stylus pen. You will also have the option to use both screens to increase the viewing space of a web page. The Nintendo DS Browser is scheduled to hit Japan in June.

Also revealed at the conference was the upcoming TV adapter for the Nintendo DS. Working with a digital company called 1-Seq. Nintendo will release a TV adapter which fits into the DS card

DS地上波デジタル放送 slot. The TV adapter has an antenna that can pick up standard television broad-

casts. The bottom screen will be used to navigate the channels, while the TV image will appear on the top screen. The TV unit is still in the early stages of production. In fact, at the conference, the prototype TV adapter was sticking out of the GBA slot. The TV functionality for the DS should be available in Japan before the end of the year. Watch out, PSP!

DORAEMON DS

Only one hundred people who bought Sega's Doraemon Nobita No Kyoryu 2006 DS (Doraemon and Nobita's Dinosaur 2006 DS) for the Nintendo DS have the chance to

win the special edition Doraemon DS! The Dora DS features a cool design of Doraemon's face on the top cover

of the popular Pure White Nintendo DS. **Sweepstakes** winners will be an-

nounced in the summer, so keep your eyes out for online auctions. With only 100 units available, the Doraemon DS is sure to fetch a

pretty penny. Those who pre-ordered the game received a special Doraemon Nintendo DS sticker set, so if you fail to win the contest, at least you can still deck your unit out with Doraemon art. Doraemon Nobita No Kyoryu 2006 is also the title of the latest Doraemon movie, due in Japanese theaters this spring.

MOTHER 3 DELUXE SET

A Deluxe Box set is available for those who pre-order the much anticipated GBA game, *Mother 3*. The Deluxe set, which retails for 18,000 yen (about \$154), will include a *Mother "Franklin"* badge and a limited edition *Mother 3* Game Boy Micro. At press time, the Deluxe

Box set was available for purchase through Amazon's Japanese site, which does ship in-

ternationally. Fans of the *Mother* series (a.k.a. *Earthbound* in the U.S.) have been waiting for this sequel for many long years. Nintendo even showed *Mother 3* (*Earthbound 64*) as a game in development for the Nintendo 64 at one time, but it never came to be. Judging from the cult status of *Mother 3*, you can bet that

every fan of the game will pick up the Deluxe Box. In fact, Japan-

ese fans have been raving on Internet message boards, saying that they're willing to put down cash for the Deluxe set just to obtain the Franklin Badge; it seems to be even more desirable than the specialedition Game Boy Micro!

mo tative

In addition to hoarding software, video-game collectors are also known to collect action figures based on their favorite games! Namco has always been keyed into this habit, and recently put out several lines of figures in Japan. Mini-figure collectors will begin to see Namco X Capcom figures brimming in the containers of Gashapon (gumball) machines throughout Japan, including Morrigan, Chun-Li, Valkyrie, Kos-Mos and more. Of course, Xenosaga fans can't get enough of Kos-Mos, so two different PVC figures of her are available. Both of them are highly detailed, but the styles are very different, since they were designed by two different artists. The dark blue Kos-Mos retails for 4,800 ven

(about \$42), while the light blue one goes for 3,990 yen (\$34). Also in stores is the first round of *Soul Calibur 3* figures from the new Game Characters Collection line, including Taki, Kilik, Voldo and more. Each character comes with several accessories, allowing you to customize your figure any way you want. *Tekken 5*

also gets the Game Characters Collection treatment with customizable accessories. The line up includes Heihachi, Yoshimitsu, Nina and others. Figures for Round 2 of both *Soul Calibur 3* and *Tekken 5* are expected to be released shortly. Each figure costs 630 yen (about \$6).

CHIGIIRENEN

Deep in the countryside of Kyoto, Nintendo has worked with several other Japanese sponsors to erect a spectacular museum exhibit dedicated to the an-

cient Japanese card game, Hyakunin Isshu, more commonly known as Karuta. The game is a favorite New Year's pastime in Japan and consists of 100 cards, each featuring a line of poetry.

The game is played by laying all the cards out on the floor and having one person read the poetry out loud, while the players frantically search for the corresponding card. The person with the most cards is not only the winner, but

can boast their knowledge of ancient Japanese poetry! Shigureden, which roughly translates to "Drizzling Rain Hall," is based on traditional Japanese architecture and feels very much like Kyoto's other ancient tourist attractions, a vast contrast from the fun-loving image of Mario and friends. Inside the grand hall, however,

Nintendo's game-based technology blends perfectly with the wooden scaffoldings, Zen gardens and kimono-wearing attendants. Using a

technology called Nintendo Floor Vision, visitors can play the game on a large scale display of cards in a giant hall. Each visitor is handed a Nintendo DS-like touch screen device to navigate the hall and play the game. The unit is in fact a Nintendo DS, but it lacks any of the buttons; it only features the dual screens and a

stylus pen. The entrance fee is 800 yen (about \$7) for adults and 500 yen (about \$4) for students, but because of all the Nintendo Wi-Fi technology set up in the place, people with pacemakers are discour-

aged from entering. Before Nintendo made its fortunes with video games, it was known for making card decks for various games, including Karuta. Shigureden is an ode to Nintendo's origins, as well as an engaging education in Japanese culture.

DIRGE OF CERBERUS: FINAL FANTASY VII Hands-On!

Platform: PlayStation 2

North American Release Date: Summer 2006

The first salvo of the "Compilation of Final Fantasy VII" juggernaut has already been fired in Japan, with Final Fantasy VII: Advent Children storming the Land of the Rising Sun with sales of stratospheric proportions. The second wave, Dirge of Cerberus: Final Fantasy VII, hit in Japan this past January,

and will be released in the U.S. this summer. Vincent Valentine takes the starring role in this game, and his triple-barreled gun is referenced in the title. I got a chance to take the single-player portion of the import for a test drive, and here are some of my early impressions, accompanied by snappy screen-shot goodness.

Kalm Before the Storm

The game starts out with a huge celebration in Kalm, one year after the end of Final Fantasy VII: Advent Children. It's during this festival that the Deepground Soldiers attack while searching for Vincent. Innocent bystanders get rounded up and herded into shipping containers for some unknown purpose.

Vincent Has a Big Head

I hate to say it, because I love *Final Fantasy VII* and Vincent Valentine is my secret imaginary boyfriend, but there are many aspects of the first-person shooter element in this "Shooter RPG" that just aren't done well. For example, this screen shot shows one of the most ill-conceived viewing an-

gles that I've ever seen. Vincent's big head blocks a third of the frame, providing a hair shield for whatever enemy might be coming up on the left. Luckily, this isn't the only viewing option, but as Arrested Development's GOB would say, "Come on!"

Third-Person Shooter

The game switches between the first and third person, which brings me to another complaint about the control scheme. While you're in the third person, if you turn Vincent around and then switch back to first person, the camera jerks you

back around to face behind you—apparently, while in third person, the first-person camera doesn't track Vincent's perspective. This is a really annoying reason to get shot in the back.

Limit Breaks

Break forms appear in the game: Galian Beast and Chaos. The Galian Beast has been modified from its Final Fantasy VII appearance into a bipedal monster bearing a resemblance to Ifrit instead of Behemoth.

The gunplay is the main event, but Final Fantasy VII fans of Vincent's beastly Limit Break attacks get to enjoy hand-to-claw mauling action as well. Only two of his beastly Limit

Gun Barrels

Vincent's main weapon is "Cerberus," his triple-barreled gun. It's possible to customize the gun by attaching different types of barrels. It's a bit hard for us to judge, since our intrepid Japanese expert is currently roughing it in the northeastern U.S., but it looks like you can also attach Materia to further customize the gun's capabilities. In the above screen shots, you can see that the barrel length is also shown in the bottom left corner of the HUD (headsup display).

Jukebox Shop

I only came across one of these while I was playing, so I have no idea if it's the standard, but this jukebox was actually a shop where you could buy items. Vincent has very limited holding capacity, but he can store up to four potions.

Large-Scale Bosses

The first real boss fight of the game is against an armed transport helicopter that occasionally drops Deepground Soldiers into the combat area. It circles a courtyard with a raised platform in the center that Vincent can climb to try to get

a better shot. The helicopter can't be targeted until it draws within a certain range. As for the Deepground Soldiers, they tend to take cover behind explosive barrels...so they are easy to kill, at least in this early level.

Reeve Tuestis

ployee controlling the fortune-telling robot Cait Sith to spy on Cloud and the gang. In *Dirge of Cerberus*, he's in charge of the World Restoration Organization (WRO), an environmental group devoted to saving the planet.

Very early on in the game, Reeve Tuestis shows up and plays a joke on Vincent that I refuse to ruin for anyone. During Final Fantasy VII, Reeve was a Shinra em-

Size Isn't Everything

Azul and Shelke are both elite members of the Deepground Soldiers, the mysterious group that attacks Kalm one year after the end of Advent Children. It's only when Shelke and Azul are standing side-by-side that the enormous size difference between them becomes obvious. In fact, during part of the game, Azul picks Shelke up like a doll and carries her away with one hand! Shelke apparently makes up for her size handicap by having arms made of light sabers.

Lucrecia Crescent

During part of the game, you see Vincent inside Lucrecia's Cave, pining after the woman who jilted him. Lucrecia was Vincent's old girlfriend, but she eventually broke it off with him and started dating Hojo, the mad scientist. While she is pregnant, she and Hojo experiment with injecting Jenova cells into her unborn child. Vincent's unrequited feelings for her seem

to have continued unabated, despite A) her rejection, B) the fact that she must have helped Hojo perform experiments on him and C) her current condition of being crystallized. Now that's love.

Final Thoughts

Good: Final Fantasy VII had a huge cast, but Vincent stood out from the rest, thanks to his extremely messed-up back story. His mysterious past as a Turk—and then as one of Hojo's experiments—makes him an excellent character to explore further. Plus, he kind of looks like a vampire.

Bad: The FPS portion. The control choices seem so obviously counterintuitive, I can't help but wonder if the person responsible for overseeing this portion of the game was afraid to say something.

FINAL FANTASY FAN

Would you happen to know if the people doing the voices for Cloud, Aeris and Yuffie in Final Fantasy VII: Advent Children are the same people who did the voices in Kingdom Hearts? Also, do you know if the person doing the voice of Vincent in the movie will be doing his voice in the upcoming game Dirge of Cerberus: Final Fantasy VII?

—Jason Johnson Des Moines, IA

P.S. I hate it when they switch the person doing the voice for the character.

The voice actors in Dirge of Cerberus: Final Fantasy VII have not been confirmed yet, but Square Enix did reveal the names of some of the voice actors in the U.S. versions of Final Fantasy VII: Advent Children and Kingdom Hearts II. Cloud and Yuffie will be voiced in both by the same actors who played them in Kingdom Hearts—Steve Burton and Christy Romano, respectively. However, Aeris, who was voiced by Mandy Moore in Kingdom Hearts, will be voiced by Mena Suvari in both Advent Children and Kingdom Hearts II. When we asked Square Enix about the voice-over process, we got this response from one of their spokespersons: "The voice actors are not necessarily the same throughout all of their cameo appearances. There are several reasons why this happens, such as actor availability. Scheduling for a video game is very tough and sometimes it's impossible to line up the desired voice actor with the time set aside for voice recording."

Are you a video-game packrat? Do you own more video games than you could possibly beat in a whole year, even if you played non-stop? Would you go without food to save up the money to buy a rare TurboGrafx-16 game, an obscure Atari 2600 controller, a limited-edition Game Boy Pocket or a leather Killer Instinct jacket? If so, this monthly collector's column is for you.

COLLECTING GAME BOY

Part 5: European Game Boy Color Games

ou'd better appreciate the following info, because it has taken us months of research to put together a list of Game Boy Color games that were released in Europe, but not in North America. Even though the games are newer than the monochrome titles that we told you about in issue #134, there's a lot more of them, and some of them were released with different names in as many as four different European countries. What a confusing mess!

Like the original Game Boy software in last month's list, all of these games will work in Game Boy Color and GBA units worldwide. But there are a lot more obscure titles here that are not guaranteed to have English language options. By the time the Game Boy Color

GAME BOY

GAME BOY COLOR

was introduced in Europe, there were plenty of small developers who were ready, willing and able to make GBC games based on movies, cartoons, comic-book characters and sports leagues that are still virtually unknown in the United States. As a result, most of the following games are true European exclusives; only a few of them originated in Japan.

The Game Boy Color must have been huge in Europe, especially in France and Germany. There are a lot of games on the following list which were announced as upcoming U.S. releases, but never materialized here...and yet, they were deemed worthy of the European audience. Game Boy collectors, you've got your work cut out for you once again. Good luck!

and Ubi Soft were sharp enough to include a variety of language options in many of the above games, so in some cases, it's only the box that's different. For example, The Adventures of the Smurfs is the exact same game in all regions; when you choose a language at the start of the game, the title screen will change to match the name on the chosen country's box art.

GRAND THEFT AUTO: SAN ANDREAS

Cheat Codes Enter the following cheat codes at any time during the game (but not while paused). Each time you enter a code successfully, a message will appear in the upper left corner of the screen to confirm. Note: Some of the codes cannot be deactivated once you've turned them on; you must reset the PlayStation 2 in order to restore the game to normal. Do not save your game after entering codes; if you do, the codes may be permanently activated in your save file and your save file may become corrupt. Activating cheats will lower your in-game ranking. Also some codes may cause unpredictable results which may cause the game to "crash," especially if you have several codes in effect at once. Codes that modify the appearance or behavior of vehicles or pedestrians will usually not affect those that are already in the immediate vicinity; you'll see the effects when new vehicles or pedestrians appear. The codes that cause vehicles to appear may not work if you're too far from a street or other area where vehicles are allowed to drive.

Mega Man X4: Alternate Mega Man X

At the Mega Man X4 character-select screen, enter the following code carefully: Highlight Mega Man X, press the O button twice, press Left six times, then hold L1 + R2 and press START. When the game begins, Mega Man's costume will be slightly different—his arms and legs will be purple instead of light blue. More importantly, as you play the game with this code in place, you'll find different power-up items in the capsules that Dr. Light has scattered throughout

Mega Man X4: Play as Black Zero

At the Mega Man X4 character-select screen, enter the following code carefully: Highlight Zero, hold the R1 button, press Right six times. release R1, hold O and press START. When the game begins, Zero's costume will be black instead of red. Unfortunately, this code has no ef-

fect on the gameplay.

Mega Man X5: Start With Ultimate Armor

At the main menu in Mega Man X5, select "Game Start." At the player select screen, move the cursor to Mega Man X, then press Up twice, then Down nine times. To unlock Zero's Ultimate Armor, move the cursor to him and instead press Down twice, then Up nine times. You'll hear a special sound effect after entering either code correctly. When you begin the game, the player you chose will be wearing the Ultimate Armor. Mega Man X6: Secret Codes

Use these codes to play as alternate versions of X or Zero in Mega Man X6. Note that you can only use one code at a time; for example, if you want to play as Nightmare Zero, you won't be able to use Ultimate Armor X in the same game.

· Ultimate Armor X—Press START at the first Mega Man X6 title screen, then press Left, Left, Left, Right at the Game Start/Continue/Option menu. You'll begin the game with X's Ultimate Armor, which is very much identical to the same Armor from Mega Man X5. It allows X to fire a super charged shot, hover in place and perform the Mega Crush attack at will

 Nightmare Zero—Press START at the first Mega Man X6 title screen, then press L1, L1, L1, R2 at the Game Start/Continue/Option menu. When you rescue Zero after defeating him in battle, you'll play as the Nightmare version of Zero instead of the normal version. Nightmare Zero has all of Zero's normal moves, but he is much more

Money Tree

Search your town for a glowing spot on the ground; you'll find one per day. Dig up the glowing spot with your shovel to find bells. Notice that the hole is still glowing after you re-move the bag of money. If you bury some bells in that spot, it may grow into a "money tree" that drops bags of bells like fruit. (The bells won't reappear after a few days the way fruit does.) Try different denominations for different results.

Get the Golden Shovel

Buy an extra shovel from Tom Nook and bury it in the glowing spot (see above) before you leave the acre it's in. If the spot is not too close to a wall, bush or other obstacle, a special golden tree may appear. Within a few days, it may bear fruit in the form of a special golden shovel. The golden shovel can be used to dig up bells from random spots all over your town You can also use it to find rare items on the island by using the following method: Bury unwanted furniture on the island, then leave the golden shovel there along with various kinds of fruit. Playing on the Game Boy Advance, feed your islander fruit until he or she has a very happy, squinting smile, then have the islander dig up the furniture with the golden shovel. He or she will replace the furniture items with rare "island" items or even NES games such as Baseball or Wario's Woods. Now return to the island on the GameCube to retrieve your golden shovel and dig up the rare items the islander buried.

To get a special golden axe which never breaks, you must maintain what the wishing well considers to be a "perfect" town as determined by

the following criteria:

1) Pull all of the weeds in your entire town and pick up all of the trash from the ground.

2) Plant and/or chop down trees until there are between 12 and 14 trees in every acre where it's possible to do so.

3) Plant lots of flowers (flowers can reverse the negative effects of weeds that you may have

Once you've done all this, speak to the wishing well and ask it "How are things?" If it says "Everything is perfect! [Town name] is a very liveable place," you must then maintain the town for two full weeks without any lapses in the "perfect" rating. The next player who visits the wishing well after the 14th day will be given a golden axe by the well spirit. If you get any other message from the wishing well, it's probably because you didn't count the trees correctly. To help you determine which acre each tree is in, pay attention to the invisible borderline that causes the screen to scroll into the next acre when you cross it

Cheat Code

At the main menu, press Z, Z, Y, Y, X, X, B, B, START, START. A new "Cheats" option will appear in the Options menu.

CRAZY TAXI

Secret Bicycle

To drive a secret bicycle instead of a cab in Arcade or Original mode, carefully enter the following code at the character-select screen:

Hold L, hold R, release L, release R Hold R. hold L. release R. release I.

When you lock in your character with the A button, you'll hear a bicycle bell to confirm that the code has been entered correctly

Another Day

Use the following code at the character-select screen in Arcade or Original mode. When the character you want to choose is on the screen, press and release R once, then hold down R and press A. You'll see the words "another day" appear in the lower left corner of the screen. In this mode, you'll have a different starting point and your customers will be in different locations.

No Arrows
From the "Mode Selection" screen, choose ei-"Arcade" or "Original." At the next menu, highlight the type of game you would like to play, then hold R and press START. Continue to hold both buttons until the words "no arrows" appear in the lower left corner of the screen. In this mode, the arrow at the top of the screen will not appear.

No Destination Mark

From the "Mode Selection" screen, choose either "Arcade" or "Original." At the next menu, highlight the type of game you would like to play, then hold L and press START. Continue to hold both buttons until the words "no destination mark" appear in the lower left corner of the screen. In this mode, your passenger's destination will only be identified by a single green line at ground level, so you won't be able to see it from a distance like you usually can

Expert Mode

From the "Mode Selection" screen, choose either "Arcade" or "Original." At the next menu, highlight the type of game you would like to play, then hold L + R and press START. Continue to hold all three buttons until the word "EX-PERT" appears in the lower left corner of the screen. This trick combines the effects of the "No Arrows" and "No Destination Mark" codes. Speedometer

You need a second controller plugged into Port 3 to enter the remaining codes. At any time during a game, hold R and press X five times using Controller 3. A "mph" indicator will appear next to the Drive/Reverse lights in the lower right corner of the screen.

Alternate Camera Angles

Use the following button combinations on Controller 3 to change the camera angle at any time during the game:

- Hold R and press Y on Controller 3 to switch to a camera that follows you from a fixed location and moves to various fixed locations as you drive around.
- Hold R and press B on Controller 3 to toggle between two additional camera angles. One is a first-person view through the windshield of your cab and the other is a close-up view of your passenger's face.
- Hold R and press A on Controller 3 to return to the default view.

- Ristar-Play Blue Sphere, Knuckles in Sonic 2. Sonic 3 & Knuckles and Flicky 30 times each Sonic the Hedgehog: Stage Select/Sound Test

At the title screen—just as Sonic is starting to appear-press Up, Down, Left, Right. You'll hear a chime. Now hold the B button and press START to get a secret menu that allows you to start at any stage or hear any of the game's music or sound effects.

Sonic the Hedgehog: Debug Mode

At the title screen—just as Sonic is starting to appear—press X, X, Up, Down, Left, Right. You'll hear a chime. With this code in place, you'll have access to the following features:

- System Reset—Press START to pause the game, then press B to reset to the title screen
- · Slow-Motion-Press START to pause, then

hold the A button to play in slow motion. If you tap the X button while paused, you'll adnce the action one "frame" at a time.

 Debug Mode—When the name of the current zone appears in big letters at the start of a stage press the R button and hold it down until Sonic appears. Your "Score" indicator will be replaced by a bunch of hexadecimal numbers. Now you're invincible; the only thing that can kill you is if you fall off the screen. Press A during gamenlay to change Sonic a different object from the game; while Sonic is a different object, you can move the object anywhere in the current stage with the D-pad. Also, when in "object" mode, press B to change to a different object. X to place a copy of that object on the screen or A to change back into Sonic and continue play. Use this feature to modify the game's stages or even "draw" hundreds of gold rings on the screen; when you change back into Sonic you can pick them all up.

Sonic the Hedgehog 2: Stage Select
At the "Sound Test" menu, listen to sounds 19, 65, 09 and 17 in order; you'll hear a chime when you activate the last sound. Next. return to the title screen, highlight "1 Player", hold B and press START to access the stage-select menu. With this code in place, you'll also have access to the following features

• System Reset—Press START to pause the game, then press B to reset to the title scre-

Slow-Motion—Press START to pause, then hold the A button to play in slow motion. If you tap the X button while paused, you'll adance the action one "frame" at a time

Sonic the Hedgehog 2: Chaos Emeralds Cheat At the stage-select menu (see above), highlight "Sound Test" and listen to sounds 04, 01, 02 and 06 in order; you'll hear the fanfare that sounds when you get a Chaos Emerald. This code gives you all of the Chaos Emeralds: you can grab 50 rings and jump to change into Super Sonic, You'll also be able to see the 'good" ending when you beat the game.

Sonic the Hedgehog 2: Debug Mode At the stage-select menu (see above), highlight "Sound Test" and listen to sounds 01, 09, 09 02, 01, 01, 02 and 04 in order; you'll hear a chime to confirm. Now highlight the name of any stage, hold the **B** button and press **START**; don't release B until the stage begins. See the codes for the original Sonic the Hedgehog above to find out how the debug mode works; the only difference is that you don't get invincibility when you enter the Debug Mode in Sonia

Sonic the Hedgehog 2: "Night" Mode

Enter the "Debug Mode" code above, then highlight the name of any stage at the stageselect menu, hold the X button and press START. This darkens the graphics, making it appear as if you're playing at night. Sonic the Hedgehog 3: Stage Select

After the Sega logo appears at the start of the game, you'll see a blurry scene of Sonic rushing toward you. The instant Sonic appears, quickly press Up, Up, Down, Down, Up, Up, Up, Up, You'll hear a chime to confirm the code. Note: This is an extremely difficult code to enter. It took us about 100 tries before we got it to work with the GameCube controller. You must press the buttons at a consistent speed, starting at the exact moment when the screen turns black; you should finish entering the code just a split-second before the screen turns pure white. Use a very light touch on the D-pad or analog stick and press Up and Down evenly, making sure not to touch the diagonals. If you don't hear the chime, just press Z and pick "Game Title" to try again. Once you've done it right, press Up or Down at the title screen menu u you see a new item called "Sound Test": this gives you a stage-select and sound test menu. The list even includes the names of zones that were taken out of the game before it was released. You can't play these stages, but you can hear the music from them with the Sound Test option. With the code in place, you have access to the following features:

· System Reset—Press START to pause the game, then press B to reset to the title screen Slow-Motion—Press START to pause, then hold the A button to play in slow motion. If you tap the X button while paused, you'll ad-

ance the action one "frame" at a time

Sonic the Hedgehog 3: Debug Mode At the stage-select menu (see above), highlight the name of any stage, hold the B button and press START; don't release B until the stage begins. See the codes for the original Sonic the Hedgehog above to find out how the debug mode works; the only difference is that you don't get invincibility when you enter the Debug Mode in Sonic 3. However, if you get killed when playing in Debug Mode, just press the A button quickly before Sonic falls off the screen with the surprised expression on his face; this will change him into an object and freeze the action. Now just use the D-pad to move the object to a safe place and press A to change back into a healthy Sonic.

Sonic the Hedgehog 3: Secret Special Stage

At the stage-select menu (see above), select the 'Sound Test" option and listen to sound 01. then 03, then 05, then 07; you should hear a chime when you select the last number. Now highlight "Special Stage 2," hold the B button and press START to play a secret special stage Sonic the Hedgehog 3: "Night" Mode

Cheat Codes

Enter the following cheat codes at any time during the game (but not while paused). Each time you enter a code successfully, a message will apnear in the unner left corner of the screen to confirm. Note: Some of the codes cannot be deactivated once you've turned them on; you must reset the Xbox in order to restore the game to normal. Do not save your game after entering codes: if you do, the codes may be permanently activated in your save file and your save file may become corrupt. Activating cheats will lower your in-game ranking. Also, some codes may cause unpredictable results which may cause the game to "crash," especially if you e several codes in effect at once. Activating certain codes may prevent other codes from being activated. Codes that modify the appearance or behavior of vehicles or pedestrians will usually not affect those that are already in the immediate vicinity; you'll see the effects when new vehicles or pedestrians appear. The codes that cause vehicles to appear may not work if you're too far from a street or other area where ehicles are allowed to drive.

SPIDER-MAN 2

At any time during gameplay, pause the game, enter the Save/Load menu and select "New Game." At the "Enter Name to Start New Game" prompt, enter "HCRAYERT" as your name and select "Enter;" you'll see the name

disappear. Now simply back out of the "Enter Name" screen and unpause; you'll warp directly to Chapter 16 with at least 44.38% of the game completed. This code also gives you 200,000 Hero Points, all four Boss Awards, the Web Zip upgrade and six Speed Swing upgrades. You can also enter the code at the "Enter Name" prompt that appears when you load the game without a save file present. Entering the code repeatedly will allow you to rack up additional Hero Points; they won't count toward the 50,000 you need to finish Chapter 16, and they may not appear in the Hero Points total at your "Status" screen, but they'll be there when you enter a Spidey Store.

STEEL BATTALION

Unlock Free Mission Mode

Note: This code requires the player to set the Tuner Dial on the Steel Battalion controller to specific positions. Unfortunately, the settings on the Tuner Dial are not labeled. For the purposes of explaining the code, we will refer to the individual hash marks around the Tuner Dial as numbers from 0 through 12, starting from the extreme left position. In other words, 0 is straight left, 4 is straight up, 8 is straight right and 12 is straight down.

At the title screen, move the Tuner Dial to the following positions, one at a time, and pause for a second or two at each number position: 1. . 9. 0. 9. 0. 6. In other words, set the Tuner Dial in the 1 position, wait a moment, turn the dial clockwise for eight "clicks" to the 9 position, wait a moment, turn the dial counter-clockwise for two "clicks" to the 7 position, etc. When you've entered the code correctly, you'll hear a sound effect to confirm. Now you can select "Free Mission" mode from the main menu which allows you to play any mission at any difficulty setting with all of the VTs unlocked.

ADVANCE WARS: DUAL STRIKE

Unlock Additional Battle Maps
Insert either of the Advance Wars Game Boy Advance games into the GBA cartridge slot of your DS before powering on the system to play Advance Wars: Dual Strike. Select "Battle Maps" from the main menu and you'll find that additional maps are available. If you have Advance Wars inserted, you can purchase the Hachi's Land, Nell's Land and Advance Warpaper Battle Maps. If you have Advance Wars 2: Black Hole Rising inserted, you'll be able to purchase the Sturm's Land, Lash's Land and Advance Warpa-per 2 Battle Maps. Each of these maps can be purchased for only one point

Unlock Advance Wars Custom Map

At the System Menu screen, choose "Design Room," then select "Map" and immediately hold down the L and R buttons while the screen fades out. A special pre-made map will appear with terrain that spells out "Advance Wars."

ANIMAL CROSSING: WILD WORLD

Get a Golden Shove

Buy a second shovel from Tom Nook and bury one of them in the ground. Remember where you buried it, and dig it up 24 hours later to find a Golden Shovel. The Golden Shovel can be used to plant money trees, although they will not always bear fruit. Get a Golden Net

Catch all the bugs that appear in the game to get the Golden Net from Tortimer. It is not necessary to donate them to the museum, as long as you have caught them all. Note that bugs given to you by another player do not count to-ward getting the Golden Net. The Golden Net is wider than the regular net, making it easier to catch bugs.

Get a Golden Rod

Catch all the fish that appear in the game to get the Golden Rod from Tortimer. It is not necessary to donate them to the museum, as long as you have caught them all. Note that fish given to you by another player do not count toward getting the Golden Rod. The Golden Rod makes it slightly easier to catch fish.

Get a Golden Can

Once Pelly or Phyllis deems your town perfect, keep it perfect for 16 days. The next time you speak to Pelly or Phyllis, you'll get the Golden Can. Using the Golden Can on withering flowers can turn flowers gold.

Get a Golden Slingshot

Shoot 15 floating presents out of the sky with the Slingshot. The 16th present you see float by will be the Golden Slingshot, so don't miss it! The Golden Slingshot fires three bullets at a time, making it easier to shoot down presents. Get a Golden Axe

Buy a red turnip from Joan and bury it in the ground. This starts a long trading quest which can get you some rare items, such as Tom Nook's Pic, K.K.'s pic, Pascal's Pic and the Golden Axe Water the red turnip daily and dig it up later. (For this purpose, you can dig it up after one day if you don't feel like spending the time.) The next time Wendell is in town, give him you red turnip. He'll either give you the country guitar or the turban. If you get the country guitar, give it to K.K. Slider the next Saturday and he'll give you his picture. But if Wendell gives you the turban, give it to Saharah to get either a massage chair or a red vase. Give the red vase to Crazy Redd when he's in town to get the safe, which you should give to Tom Nook in exchange for his picture. If you got the massage chair, give it to Tortimer on your town's next holiday to get a scallop. Give the scallop to Pascal when you next see him to get either the Golden Axe or Pascal's pic. You can start the guest over (by purchasing another red turnip) if you want to keep all of the items mentioned above

· Dedede Ball-After you unlock the Waddle Dee Ball, you can buy the Dedede Ball in the Medal Swap for 20 medals. He has seven hit points, and swings a hammer when you tap im. He also cannot obtain powers. He's much larger and heavier than Kirby.

 Meta Knight Ball—After you unlock the Dedede Ball, you can buy him in the Medal Swap for 25 medals. He only has three hit points. He's much lighter than Kirby, but he's slightly stronger

 Waddle Doo Ball—After you've beaten the game at least once, insert Kirby and the Amaz-ing Mirror or Kirby: Nightmare in Dreamland into the Game Boy Advance cartridge slot of your DS. When you start a game of Kirby: Canvas Curse, Waddle Doo Ball will be available. An alternative way to unlock him is to beat the game with all four of the other characters. He as five hit points and the Beam ability. He can't obtain any other powers. Jump Game Medal

The Jump Game unlocks in the Game Select menu after you beat the game with every character. If you manage to launch Kirby 1,500 meters, you'll land right on top of a medal, which is sitting on the course. The best way to launch Kirby this far is to preserve enough ink so you can draw a second ramp when Kirby is already

NINTENDOGS

Extra Treats

When you're training your dog to learn tricks, a yellow light bulb will appear over its head. You can grab the light bulb and feed it to your dog like a treat! You might also notice that some times a yellow bone will appear if you've been petting your dog a lot. You can feed this to it,

Constant Walks

Usually you can only walk your dog every half-hour. However, there is a trick that you can use to get around this limitation. Walk your dog to the park, then switch one of its accessories. The game will automatically save. Turn off the game and you can take your dog for a walk again immediately! This is a great way to increase your chances of finding rare presents. Mystery Presents

When walking your dog, sometimes you'll see a present just lying on the sidewalk. Your dog will only pick it up if you notice the present and jerk

your pooch in the direction of the present. These presents are usually better than the ones that are already marked by Question Marks on the map

PUYO POP FEVER

Unlock All Gallery Items
Choose "Options" from the main menu, then select "Gallery." At the Gallery menu, highlight "View Cut scenes," hold the X button and press Up, Down, Left, Right. You'll hear a sound to confirm; now all of the cutscenes and the voice samples for all characters will be unlocked Endless Puyo POP Character Select/Pattern

Change Select "Endless Puyo POP" from the main menu, then highlight the mode you wish to play and press Up, Down, X, A. You'll hear a sound to confirm, and the character-select screen will appear, allowing you to play as any character in this mode. Also, if you hold the X button down while selecting your character, you will be able to play with that character's puyo pattern instead of the "classic" pattern (Arie's pattern). Note that your high scores will not be saved when playing with the character-select active.
Single Puyo POP Character Select

Select "Single Puyo POP" from the main menu, then highlight the mode you wish to play and press X, Down, Up, A. You'll hear a sound to confirm, and the character-select screen will ap pear, allowing you to play as any character in this mode. Note that no cutscenes will appear and your high scores will not be saved when playing with the character-select active. Classic Pattern

If you hold the X button down while selecting your character in Single or Everybody mode, you will play with the "classic" puyo pattern (Arie's pattern) instead of the pattern of the character

you chose. Everybody Puyo POP Cheat

To force the computer player(s) to lose during a game of Everybody Puyo POP, hold L + R and press SELECT

Computer Control

In any game mode with a handicap option before the match, if you hold the SELECT button down while choosing your handicap, the computer will control your character. Bonus Pictures

If you play Puyo Pop Fever with a copy of the Game Boy Advance version of Puyo Pop Fever plugged into the GBA cartridge slot of your Nintendo DS, you'll find extra pictures of the characters in the Gallery under "View Cut scenes. Microphone Tricks

· If you blow into the DS microphone at the main menu screens, bubbles will appear and the menu options will bounce.

 If you blow into the DS microphone during the instructional demo, the characters on the bottom screen will turn around to look at you.

 If you blow into the DS microphone when the map is displayed on the bottom screen during a cutscene, the character will react. Blow gently and the character will fight the wind; blow hard and he or she will be blown away.

• If you blow into the DS microphone during a match, your character will speak.

· If you blow into the DS microphone at the title screen, a mini-game will begin. A score will be displayed and a giant puyo will fall from the top screen. The object is to keep the puyo from falling off the bottom screen by using the stylus to bounce it back up. For best results, keep the

stylus in contact with the touch screen and push the puyo up from below. You'll score a point for each bounce. After ten bounces, another puyo will appear; after 20 more bounces, a third will appear, with more appearing every ten bounces after that (up to a maximum of six). The last puyo to appear will be a nuisance puyo. If any one puyo falls off the screen or if you hit a puyo in its center, all of the puyo on the screen will pop. You can also push all of the puyo back up at once by blowing into the DS microphone, but you lose points for doing this.

Secret Mini-Game If you complete the WakuWaku Course or Hara-Hara Course in Single Puyo POP mode at Normal difficulty or higher, you can play a mini-game while the credits are being displayed. Look closely at the pictures of each character and find the difference between the picture on the top screen and the one on the bottom screen. If you tap the part of the picture that's different on the touch screen, it will advance to the next character. (Note: You must tap it twice). Nine different characters will be displayed in succession, or 16 if you cleared the course without continuing. If you identify the flaw on all of the characters before the credits end, a special picture will be displayed

RESIDENT EVIL: DEADLY SILENCE

Special Key
If you clear the game and get the "best" ending for either character, you will earn a special key (To get the best ending when playing as Jill, you must rescue both Chris and Barry. To get the best ending when playing as Chris, you must rescue both Jill and Rebecca) If you load your game from a save where you unlocked the key, it will appear in your inventory at the start of the game. The key unlocks the door behind the dressing room (the room with the huge mirror on the wall) on the first floor of the mansion. You have to get the Armor Key first so you can unlock the big brown double doors to the east of the central room. Inside this room are brandnew outfits for Chris and Jill; one each in Classic mode and two each in Rebirth mode Master of Knifing

Beat the game once in either Classic or Rebirth Mode to unlock a five-stage mini-game called "Master of Knifing."

Rocket Launcher

If you beat the game in under three hours, you'll unlock a Rocket Launcher with unlimited ammo that you can use from the start.

Note that items that you unlock are restricted to the file you used to save your clear data—if you got it by playing Jill/Classic, you can only use the item during a replay of Jill/Classic, etc.

THE RUB RABBITS!

To unlock the following items, simply insert the corresponding Game Boy Advance cartridge into the GBA slot of the DS before turning the system on. When The Rub Rabbits! game loads, a message will appear on the screen to confirm what has been unlocked.

Insert Sonic Advance cartridge—Unlock 04 ac-

GRAND THEFT AUTO: LIBERTY CITY STORIES

Secret Cheat Codes

Enter the following cheat codes at any time during the game (not while paused). Each time you enter a code successfully, a message will appear in the upper left corner of the screen to confirm. Note: Most of the codes cannot be deactivated once you've turned them on; you must exit the game in order to restore the game to normal. Do not save your game after entering codes; if you do, the codes may be permanently activated in your save file. Also, some codes may cause unpredictable results which may cause the game to "crash," especially if you have several codes in effect at once. Codes that modify the appearance or behavior of vehicles or pedestrians will usually not affect those that are already in the immediate vicinity; you'll see the effects when new vehicles or pedestrians appear. The codes that cause vehicles to appear may not work if you're too far from a street or other area where vehicles are allowed to drive. Activating cheat codes will lower your criminal rating number.

MEGA MAN: MAVERICK HUNTER X

Alter Stage Conditions
• After defeating Chill Penguin, the lava in Flame Mammoth's stage will freeze, making the stage less dangerous.

Beating Storm Eagle's stage will shut off the electric traps in the beginning of Spark Mandrill's stage, but will also cause the lights throughout the rest of the stage to flicker on and off

 Defeating Launch Octopus fills the crevice in Sting Chameleon's stage, allowing you to reach the extra life power-up.

Zero's Buster

If you haven't received the Arm Parts from Dr. Light by the time you fight Vile in Sigma Palace 3, Zero will give you his Arm Parts: they fire a different Charge Shot that causes more damage. Secret Capsule

To use Ryu and Ken's Street Fighter Hadoken fireball as Mega Man X, beat all eight bosses and collect all the Life-Ups, Sub Tanks and Armor Parts. Make sure all of your Sub Tanks are full, then play through Armored Armadillo's stage without taking any damage. This is easier than it sounds if you make good use of the Rolling Shield and Storm Tornado. At the end of the stage, jump off the final mine cart so that you stick to the wall above the boss' door, and climb until you reach Dr. Light's Capsule. The Hadoken will kill any boss in one hit (except the final boss) and can be executed in the same way as in the Street Fighter series: Quickly rotate the D-pad or analog stick in a quarter-circle movement from Down to Forward, followed immediately (if not simultaneously) by the Attack button.

By jumping up near the middle of Armored Armadillo's stage, you'll find a special bat hovering just above the screen. Unlike all the other bats in the game, it resembles the bats from Mega Man 7 and 8. It drops a 1-Up almost every time you kill it, and re-spawns when you leave the screen. Kill it repeatedly to get up to nine lives at a time.

DO YOU KNOW THE SECRET OF THE

SIESY COESE

TIPS & TRICKS may be the #1 Video-Game Tips Magazine, but even our most skilled cheat finders get stumped every once in a while. The following codes are known to exist in the games shown, but even after extensive testing, we still can't figure out what they do. (In some cases, they may not do anything.) If you can solve the mystery, you might win a prize....

#63 MLB OG: THE SHOW

The Code: Enter the following code at the main menu:

Left, Right, Right, Down, Down, Left, Up, Up What We Know: This code causes the controller to vibrate just like all of the other known cheats in MLB 06: The Show, but we haven't been able to figure out what it does. It is exactly the same as the code that unlocked all of the teams in MLB 2005, but it does not seem to have the same purpose in this game. Can you solve the mystery?

464 URBAN REIGN

The Code: Enter the following code at the game's title screen:

L1, R1, L2, R2, L2, O, R2, Up, R2, R2, O, X, R1

what We Know: This code triggers an exclamation mark in the corner of the title screen, just like the rest of the *Urban Reign* cheats you'll find in our *PlayStation 2 Tips* section, but we haven't been able to identify any change in the game that results from entering it. You can win a *Tips & Tricks* cap if you're the first person to tell us what this code is used for. *Can you solve the mystery?*

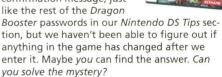

<mark>#65</mark> Dragon Booster

The Code: Choose "PassWord" from the main menu, then tap the following symbols to enter the code as shown:

Dragon Eye symbol (black), front row Penn Racing symbol (gold), back row Army of the Dragon symbol (purple), front row Voice of the Dragon symbol (cyan), back row Penn Racing symbol (gold), back row Army of the Dragon symbol (purple), front row What We Know: This code gives you a "SUCCESS" confirmation message, just

Think you've got what it takes to beat the TIPS & TRICKS editors at our own game? Test out these codes for yourself; if you're the first person to tell us exactly what they do, we'll send you your very own TIPS & TRICKS cap and print your name right here so all the world will

know that you were the one who solved the mystery. No guesses, now—you must describe the dif-

ference in the game that results from entering the code so we can verify that your answer is correct. Send your answers to:

TIPS & TRICKS Mystery Codes 8484 Wilshire Blvd. Suite 900 Beverly Hills, CA 90211 Please note that these codes may not have any effect at all; there's a very strong possibility that they were left in the games inadvertently or that their effects were intentionally disabled before the games were released. However, we invite you to prove otherwise.
